[Paleoneurology 1804-1966](#) T. Edinger,2012-12-06 Dr Tilly Edinger s first published paper dealt with a brain cast in more exact terms an endocast of the cranial cavity of Noth08auru8 a Triassic relative of the plesiosaurs With this she embarked on a working lifetime of devotion to paleoneurology a field of study that she was to transform A daughter of the famous neurologist Ludwig Edinger it was appropriate as well as fortunate that her early interest in fossil vertebrates should have become focused upon the recovery of such information concerning the history of the central nervous system as could be obtained from fossil material Her father evidently had no direct influence upon her choice of this then obscure and difficult subject although within the family circle

she presumably absorbed from him some appreciation of neoneurology Indirectly however through his accumulation in Frankfurt of an outstanding collection of recent brains he provided the comparative material essential to her studies during the years she spent there Early in her career she published *Die FOBsilen Gehirne* 1929 Here was gathered together for the first time nearly all the widely scattered information on the topic It had an immediate effect As one author justly remarked this invaluable review serves not only as a basis for continuing and systematizing research on brain casts but also as an indication of the more serious gaps in present knowledge Simpson 1933 The bibliography appended to it listed 250 titles A bibliography she published in 1937 included 160 additional titles *Digging for Stegosaurus* Thomas R. Holtz, Jr. Jr.,2015-02-01 You can t miss Stegosaurus s armored plates but how did such an ancient creature become so recognizable to us Follow the fascinating story of this dinosaur s discovery from early clues in England to fossil findings in Colorado Alberta and Tanzania Each dig added a piece to the scientific puzzle that eventually revealed Stegosaurus With supports for the Common Core and visual learning Dinosaur Discovery Timelines provide a fresh approach to prehistoric creatures
