The German Genius Peter Watson, 2010-09-16 From the end of the Baroque age and the death of Bach in 1750 to the rise of Hitler in 1933 Germany was transformed from a poor relation among western nations into a dominant intellectual and cultural force more influential than France Britain Italy Holland and the United States In the early decades of the 20th century German artists writers philosophers scientists and engineers were leading their freshly unified country to new and undreamed of heights and by 1933 they had won more Nobel prizes than anyone else and more than the British and Americans combined But this genius was cut down in its prime with the rise and subsequent fall of Adolf Hitler and his fascist Third Reich a legacy of evil that has overshadowed the nation's contributions ever since Yet how did the Germans achieve their pre-eminence beginning in the mid 18th century In this fascinating cultural history Peter Watson goes back through time to explore the origins of the German genius how it flourished and shaped our lives and most importantly to reveal how it continues to shape our world As he convincingly demonstrates while we may hold other European cultures in higher esteem it was German thinking from Bach to Nietzsche to Freud that actually shaped modern America and Britain in ways that resonate today

Wahrheit - Theologie und Naturwissenschaft Hans Schwarz,2012-03-07 During the 19th century the natural sciences set up a firmly established and nearly unassailable canon of knowledge that since has seemed to challenge the Christian worldview The natural sciences deliver facts theology mere beliefs Is that true A look at the long history of both disciplines however shows how important a common dialogue truly is Why should genetic engineering be a problem if it can save human lives How much grain should we be allowed to burn in our vehicles These and other questions cannot be answered solely by referring to scientific facts or to ethical principles Rather theology and science must work together But how Hans Schwarz takes a look at the past 400 years of ongoing dialogue and explains the present state of the international controversy

Justified Faith without Reasons? Valentin Teodorescu,2023-11-06 This study intends to show that the answer to the question whether faith can be justified without proofs can be resolved by importing ideas from S ren Kierkegaard s and Alvin Plantinga s affirmative take on the matter There is a deep similarity between the way they understand belief in God and belief in Christianity The authors share the modern idea that there is an objective truth combining it with the postmodern stance that no method exists which would guarantee access to it One can see at both authors not only a deep commonality of ideas but also a remarkable way in which their understandings augment each other Whereas Kierkegaard comes to the provocative conclusion that if a person wants to live authentically she will meet Christ on her life s journey without needing any proof Plantinga s inquiry contributes to the rational plausibility of this Justified Faith without Reasons project

Stephen Hawking and The Universe: A Biography Ben Sztajnkrzyer,2012-02-24 ABOUT THE BOOK Stephen William

Hawking is arguably the most famous scientist since Albert Einstein. He is a theoretical physicist, applied mathematician, and cosmologist, but he is best known to non-scientists as the author of *A Brief History of Time*, his best-selling book that unraveled the origins of the universe. His fame is so far-reaching that he has appeared on such popular entertainment as *Star Trek: The Next Generation* and *Late Night with Conan O'Brien*. He has even been animated as a character on *The Simpsons*. Hawking is also well-known for being the longest living survivor of amyotrophic lateral sclerosis (ALS) or Lou Gehrig's disease. Most patients can expect to live for no more than ten years following a diagnosis of ALS, but Hawking has survived for almost 50 years since the onset of the disease. The condition has caused him almost total paralysis, confining him to a wheelchair and forcing him to speak through a voice synthesizer activated by his cheek muscle.

MEET THE AUTHOR Ben Sztajnkrzyer was born in Montreal, Canada, and moved to Los Angeles to pursue filmmaking. He is a graduate of UCLA's prestigious screenwriting program, where he won numerous awards for his work. He has written several successful telefilms and has a feature horror screenplay in development with a prominent Hollywood producer. He also teaches screenwriting at Cal State Fullerton. In a past life, he worked as an editor of academic journals, so he can tell you everything you need to know about lower extremity wounds or human lactation. In his free time, Ben loves watching *Polar Express* and *Thomas the Tank Engine* over and over and over and over with his four-year-old son. When his son goes to bed, Ben stays up late and watches horror movies. His other interests include eating fatty foods and coming up with creative new excuses not to exercise.

EXCERPT FROM THE BOOK In addition to his scientific research, Hawking has been a fierce advocate of exposing general audiences to cutting-edge science. He rose to international prominence following the 1988 publication of *A Brief History of Time*. The book received glowing reviews and went on to sell over 10 million copies. It was also adapted into a documentary film of the same name by acclaimed filmmaker Errol Morris; the film summarized not only the important themes of the book but also provided a biography of Hawking's life. The documentary won the Grand Jury Prize at the Sundance Film Festival. Hawking followed up *A Brief History of Time* with several more books aimed at general audiences, including *The Universe in a Nutshell*, *A Briefer History of Time* (co-written by Leonard Mlodinow), and *The Grand Design* (also co-written by Mlodinow). He also edited *On the Shoulders of Giants*, a collection of works by such famous physicists and astronomers as Einstein, Newton, Kepler, Copernicus, and Galileo.

Die Gestirne und die Weltgeschichte Felix Eberty, Albert Einstein, Werner Graf, 2014. Die umwälzende Erkenntnis über die Relativität von Raum und Zeit kam Albert Einstein nicht wie ein Gedankenblitz, sondern er hatte sich schon als Schüler spielerisch damit beschäftigt. Wie wäre es, wenn man hinter einem Lichtstrahl herläufe? fragte er sich. Für diese sehr originäre erscheinende hypothetische Frage gibt es eine Quelle. Felix Eberty hatte sich vier Jahrzehnte zuvor sozusagen als Zeitreisender auf eine Gedankenreise durch das Universum begeben und damit nicht nur den jungen Einstein, sondern auch eine große Leserschaft, insbesondere in England und USA, inspiriert. Dank seiner leicht verständlichen, bildhaften Sprache für schwer zu begreifende Überlegungen. Vollständiger und lektoriert Neusatz der Erstausgaben.
