Stepping Twice Into The River:

Stepping Twice Into the River Robert King, 2005 Robert King recounts his exploration of the almost unnoticeable along North Dakota's Sheyenne River from its headwaters to river's end. With every experience along the way tracing a military campaign, canoeing the river, visiting a ghost town, and even trying to sleep in an ancient Cheyenne village, King delves deeper into the river's culture. Each stop in his travels, each chapter of his writing brings to light a different aspect of the plains, focusing on Native American culture, pioneer society, religion, war, agriculture, and nature. In the hands of this gifted thinker and writer, local facts yield universal metaphor. An able guide, King illuminates the ordinary from the perspectives of history, science, and literature. Blending travel narrative, interesting details, and poetic reflection, *Stepping Twice Into the River* takes readers on a journey through time, revealing both stability and change, and offering prairie wisdom. Readers will find in Robert King an affable and delightful guide, a painter of a vivid portrait of human endeavour on the northern plains.

Stepping in the Same River Twice Ayelet Shavit, Aaron M. Ellison, 2017-04-25 An international team of biologists, philosophers, and historians of science explores the critically important process of replication in biological and biomedical research. Without replication, the trustworthiness of scientific research remains in doubt. Although replication is increasingly recognized as a central problem in many scientific disciplines, repeating the same scientific observations of experiments or reproducing the same set of analyses from existing data is remarkably difficult. In this important volume, an international team of biologists, philosophers, and historians of science addresses challenges and solutions for valid replication of research in medicine, ecology, natural history, agriculture, physiology, and computer science. After the introduction to important concepts and historical background, the book offers paired chapters that provide theoretical overviews followed by detailed case studies. These studies range widely in topics from infectious diseases and environmental monitoring to museum collections, meta-analysis, bioinformatics, and more. The closing chapters explicate and quantify problems in the case studies, and the volume concludes with important recommendations for best practices.

The Same River Twice Stephen Legault, 2015 It's been five years since Silas Pearson's wife Penelope disappeared, and two since she started appearing in his dreams. He had believed that she was trying to beckon him to her, but when her skeletal remains are found at the bottom of a reservoir, Silas is stricken with grief and struggles to understand the purpose of his dreams. And when Silas learns that Penelope's death was not accidental but a violent execution, he embarks on a renegade mission across the Colorado Plateau to hunt down the last person who saw his wife alive. The final installment in the Red Rock Canyon mystery series offers up the missing pieces in the puzzle of Penelope's disappearance and uncovers the horrible truth about who wanted her dead and why, provided by publisher.

Teachers to Live By Mary Engelbreit, 2002-03 In the fourth installment of Words to Live By series Mary Engelbreit turns her attention to teachers those who teach inside the classroom and out The result is sure to win high marks from educators and the rest of her fans Strong memories of her own early school days coupled with a deep respect for the work teachers do every day has made teachers and school children too of course frequent subjects of Mary's artwork I guess it's my little way of showing appreciation for a severely under appreciated group she says As in the other Words to Live By books Mary's artwork is presented alongside inspirational quotes from famous writers scholars statesmen and students this time with words that pay tribute to the practitioners of this most noble profession Teachers love Mary Engelbreit and this book shows that the feeling is mutual

Actology Malcolm Torry, 2020-07-08 Two streams run through the Western philosophical stream one characterized by Being beings the unchanging the static and the unitary and the other by Action actions the changing the dynamic and the diverse The former might be represented by Parmenides Plato and much of what followed the latter by Heraclitus and by rather less of what followed The book explores the Action stream as it wound its way through history through Heraclitus Plato Aristotle Hegel Maurice Blondel Henri Bergson Pierre Teilhard de Chardin process philosophy and theology Geoffrey Studdert Kennedy Ludwig Wittgenstein and John Boys Smith The journey enables us to create the beginnings of an actology a way of seeing ourselves the universe and God in terms of actions in patterns rather than as beings that change Such an actology offers a complete alternative narrative far more in tune with the diverse and rapidly changing world in which we live than the ontology that has shaped philosophy theology and much else for the past two thousand years
