Jana,2024-10-24 This textbook strikes a balance between theory and practice to introduce engineering students to numerical methods and their process applications **"Composition, Chromaticism and the Developmental Process "** Henry Burnett,2017-07-05 Musicology having been transmitted as a compilation of disparate events and disciplines has long necessitated a magic bullet a unified field theory so to speak that can interpret the steady metamorphosis of Western art music from late medieval modality to twentieth century atonality within a single theoretical construct Without that magic bullet discussions of this kind are increasingly complicated and to make matters worse the validity of any transformational models and ideas of the natural evolution of styles is questioned and even frowned upon today as epitomizing a grotesque teleological bigotry Going against current thinking Henry Burnett and Roy Nitzberg claim that the teleological approach to observing stylistic change is still

valid when considered from the purely compositional perspective The authors challenge the traditional understanding of development and advance a new theory of eleven pitch tonality as it relates to the corpus of Western composition The book plots the evolution of tonality and its bearing on style and the compositional process itself The theory is not based on the diatonic aspect of the various tonal systems exploited by composers rather the theory is chromatically based the chromatically inflected octave being the source not only of a highly ingenious developmental dialectic but also encompassing the moment to moment progression of the musical narrative itself Even the most profound teachings of Schenker and the often startlingly original and worthwhile speculations of Riemann Tovey Dahlhaus and others still provide no theory of development and so are ultimately unable to unite the various tendrils of the compositional organism into a unified whole Burnett and Nitzberg move beyond existing theory and analysis to base their theory from the standpoint of chromatic pitch fields These fields are the specific chromatic pitch choices that a composer uses to inform and design a complete composition utilizing
