Reference Guide to Africa Alfred Kagan, Atoma Batoma, 2014-10-16 This third edition of the *Reference Guide to Africa* explains the most important resources for the study of the continent of Africa. It contains a general sources section and a larger disciplinary oriented section. All sources are annotated. A new edition is sorely needed since the last edition was published nine years ago. The previous editions have been successfully used in research libraries worldwide since 1999 and it has been used to teach several African studies research courses. The book provides an orientation for researching almost any topic in the arts, humanities and social sciences concerning the continent of Africa and all of its countries and ethnic groups. The first part explains and lists portals, databases, bibliographies, indexes, guides, encyclopedias, country sources, biography, primary sources, government publications and statistics. The second part presents 16 subject oriented chapters mostly in the arts, humanities and social sciences from agriculture and food security to women studies. It covers sources that broadly cover the continent or in some cases only North Africa and the Middle East. It generally excludes sources limited to one country or region of Africa except for North Africa because of the nature of the literature. One third of the sources in this edition are new and nearly half of them are available in electronic format. There are author title and subject indexes. This unique work is intended for students, teachers, librarians and researchers. It likely will be used most by reference librarians and teachers for students in high school through graduate studies. It will also be used independently by undergraduate and graduate students. It can be used to answer simple reference questions, provide the resources for an undergraduate paper or for comprehensive work by advanced students and researchers.

Lee Marshall, 2013 The recording industry has been a major focus of interest for cultural commentators throughout the twenty first century As the first major content industry to have its production and distribution patterns radically disturbed by the internet the recording industry's content attitudes and practices have regularly been under the microscope Much of this discussion however is dominated by US and UK perspectives and assumes the recording industry to be a relatively static homogeneous entity This book attempts to offer a broader less Anglocentric and more dynamic understanding of the recording industry Its starting premise is the idea that the recording industry is not one thing but is rather a series of recording industries locally organised and locally focused both structured by and structuring the international industry Seven detailed case studies of different national recording industries illustrate this fact each of them specifically chosen to provide a distinctive insight into the workings of the recording industry The expert contributions to this book provide the reader with a sense of the history structure and contemporary dynamics of the recording industry in these specific territories and counteract the Anglo American bias of coverage of the music industry The International Recording Industries will be valuable to students and scholars of sociology cultural studies media studies cultural economics and popular music studies
