Steve Remembrances Of Stephen W Kuffler:

Steve Bernard Katz, 1990 Stephen W Kuffler was the most dominant figure in experimental neuroscience in the 1960s and 70s. The lessons he taught by example about how to do research and how to interact with one's students and colleagues transcend specific disciplines and are timeless. This volume consists of letters by Steve's former students and colleagues and a biography by the noted biophysicist Sir Bernard Katz. Altogether they demonstrate the views, achievements and versatility of this extraordinary scientist, teacher and friend.

Biographical Memoirs National Academy of Sciences, 1998-06-01

Biographic Memoirs Volume 74 contains the biographies of deceased members of the National Academy of Sciences and bibliographies of their published works. Each biographical essay was written by a member of the Academy familiar with the professional career of the deceased. For historical and bibliographical purposes these volumes are worth returning to time and again.

In Search of Memory: The Emergence of a New Science of Mind Eric R. Kandel, 2007-03-17 A stunning book by Oliver Sacks. Memory binds our mental life together. We are who we are in large part because of what we learn and remember. But how does the brain create memories? Nobel Prize winner Eric R. Kandel intertwines the intellectual history of the powerful new science of the mind, a combination of cognitive psychology, neuroscience and molecular biology, with his own personal quest to understand memory. A deft mixture of memoir and history, modern biology and behavior, *In Search of Memory* brings readers from Kandel's childhood in Nazi-occupied Vienna to the forefront of one of the great scientific endeavors of the twentieth century: the search for the biological basis of memory.

Modern Discoveries in Neuroscience... And What They Reveal About You (Collection) Dale Purves, Miriam Boleyn-Fitzgerald, Andrew Koob, 2012-02-20 Three remarkable books reveal what neuroscientists have just learned about your brain and you. Neuroscientists have made absolutely stunning discoveries about the brain, discoveries that are intimately linked to everything from your health and happiness to the age-old debate on free will. In these three extraordinary books, leading scientists and science journalists illuminate these discoveries, helping you understand what they may mean and what may come next. *In Brains: How They Seem to Work* Dale Purves reviews the current state of neuroscientific research, previewing a coming paradigm shift that may transform the way scientists think about brains; yet again, building on new research on visual perception, he shows why common ideas about brain networks can't be right. *Uncovers* the factors that determine our subjective experience, sheds new light on the so-called "ghost in the machine," and points towards a far deeper understanding of what it means to be human. *Next in Pictures of the Mind* Miriam Boleyn Fitzgerald uses images from the latest fMRI and PET scanners to illuminate science's new understanding of the brain as amazingly flexible, resilient, and plastic. Through masterfully written narrative and stunning imagery, you'll watch human brains healing, growing, and adapting, gain powerful new insights into the interplay between environment and genetics, begin understanding how people can influence their own intellectual abilities and emotional makeup, and join scientists in tantalizing discoveries about everything from coma to PTSD and Alzheimer's. Finally,

in The Root of Thought Andrew Koob shows why glial cells once thought to be merely brain glue may actually hold the key to understanding intelligence treating psychiatric disorders and brain injuries and perhaps even curing Alzheimer's and Parkinson's You'll learn how these crucial cells grow and develop why almost all brain tumors are comprised of them and even their apparent role in your every thought and dream From world renowned scientists and science journalists including Dale Purves Miriam Boleyn Fitzgerald and Andrew Koob

The Age of Insight

Eric Kandel,2012-03-27 A brilliant book by

Nobel Prize winner Eric R Kandel The Age of Insight takes us to Vienna 1900 where leaders in science medicine and art began a revolution that changed forever how we think about the human mind our conscious and unconscious thoughts and emotions and how mind and brain relate to art At the turn of the century Vienna was the cultural capital of Europe Artists and scientists met in glittering salons where they freely exchanged ideas that led to revolutionary breakthroughs in psychology brain science literature and art Kandel takes us into the world of Vienna to trace in rich and rewarding detail the ideas and advances made then and their enduring influence today The Vienna School of Medicine led the way with its realization that truth lies hidden beneath the surface That principle infused Viennese culture and strongly influenced the other pioneers of Vienna 1900 Sigmund Freud shocked the world with his insights into how our everyday unconscious aggressive and erotic desires are repressed and disguised in symbols dreams and behavior Arthur Schnitzler revealed women's unconscious sexuality in his novels through his innovative use of the interior monologue Gustav Klimt Oscar Kokoschka and Egon Schiele created startlingly evocative and honest portraits that expressed unconscious lust desire anxiety and the fear of death Kandel tells the story of how these pioneers Freud Schnitzler Klimt Kokoschka and Schiele inspired by the Vienna School of Medicine in turn influenced the founders of the Vienna School of Art History to ask pivotal questions such as What does the viewer bring to a work of art How does the beholder respond to it These questions prompted new and ongoing discoveries in psychology and brain biology leading to revelations about how we see and perceive how we think and feel and how we respond to and create works of art Kandel one of the leading scientific thinkers of our time places these five innovators in the context of today's cutting edge science and gives us a new understanding of the modernist art of Klimt Kokoschka and Schiele as well as the school of thought of Freud and Schnitzler Reinvigorating the intellectual enquiry that began in Vienna 1900 The Age of Insight is a wonderfully written superbly researched and beautifully illustrated book that also provides a foundation for future work in neuroscience and the humanities It is an extraordinary book from an international leader in neuroscience and intellectual history
