## **Steven Holl Idea And Phenomena:**

**Steven Holl** Steven Holl, 2002 An overview of the built work of architect Steven Holl Idea and Phenomena focuses on the sculptural expression inherent in his designs material composition and use of light Apparent in such projects as his Makuhari Housing in Chiba Japan where he designed a new city block on dredged fill at the rim of Tokyo Bay Holl has devoted over 20 years of his professional life to exploring the use of movable walls for creating variety and what he calls spaces for individual life Even more essential to his oeuvre is what critic Herbert Muschamp has described as its astonishing sculptural presence created from the strikingly assured interplay between windows and walls curves and grids voids and planes In his fine fibered use of materials Holl employs his principle of the stone and the feather juxtaposing thin sheets of zinc roofing with rough concrete walls along knife edged junctures The results as Idea and Phenomena clearly shows from the first sketch to the final construction are buildings alert to emotional needs the spiritual properties of space and the specifics of their own surroundings

**Phenomenology, Architecture and the Built World** James Dodd, 2017-01-05 Phenomenology Architecture and the Built World is an introduction to the methods and basic concepts of phenomenological philosophy through an analysis of the phenomenon of the built world The conception of the built world that emerges is of space and time fashioned in accordance with a living understanding of what it is for human beings to exist in the world Human building and making is thus no mere supplementary instrument in the pursuit of the ends of life but a fundamental embodiment of the self understanding of human beings Phenomenological description is uniquely capable of bringing into view the physiognomy of this understanding its texture and complexity thereby providing an important basis for a critique of what constitutes its essence and its conditions of possibility

*Invitation to Archiphen* Iris Aravot, 2010 *The Architect as Magician* Albert C. Smith, Kendra Schank Smith, 2020-05-07 The Architect as Magician explores the connection between magic and architecture There is a belief that a greater understanding of the meaning of magic provides insights about architecture and architects design processes Architects influence the effects of nature through the making of their buildings In an analogous condition magicians perform rituals in an attempt to influence the forces of nature This book argues that architects could gain much by incorporating ideas from magic into their design process The book demonstrates through historical and current examples the important influence magic has had on the practice of architecture The authors explain how magic helps us to understand the way we infuse architecture with meaning and how magic affects and inspires architectural creation Aimed at architects students scholars and researchers The Architect as Magician helps readers discover the ambiguous and spiritual elements in their design process

**Architects Today** Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings

**Architectural Science and the Sun** Dason Whitsett, Matt Fajkus, 2018-04-17 Architectural Science and

the Sun synthesizes physics climate program and perception to provide a foundation in the principles of architectural science related to the sun solar geometry solar analysis and design techniques passive design principles and daylighting Part analytical handbook part inspiration source for schematic design the content comprises a critical component of effective sustainable design Beyond the purely technical aspects of these topics Architectural Science and the Sun begins with the premise that great architecture goes beyond energy performance and the visual aesthetic to engage all of the senses Given that the stimuli to which our senses respond are physical phenomena such as light heat and sound the designer must manipulate these parameters through the craft of building form and technology to create the desired qualitative experience This book is designed to help the reader develop that skill **Steven Holl Architect** Kenneth Frampton, 2003 The definitive monograph on the leading American architect The Material Imagination Matthew Mindrup, 2016-03-03 In recent years architectural discourse has witnessed a renewed interest in materiality under the guise of such familiar tropes as material honesty form finding or digital materiality Motivated in part by the development of new materials and an increasing integration of designers in fabricating architecture a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form Yet as the ethos of material pragmatism gains more popularity theorizations about the poetic imagination of architecture continue to recede Compared to an emphasis on the design of visual form in architectural practice the material imagination is employed when the architect thinks matter dreams in it lives in it or in other words materializes the imaginary As an alternative to a formal approach in architectural design this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent architectural practice literary sources philosophical analyses and everyday experience Focusing on matter as the premise of an architect's imagination each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture **Spiritus Loci** Bert Daelemans, S.J., 2015-01-08 In Spiritus Loci Bert Daelemans who graduated as an architect and a theologian provides an interdisciplinary method for the theological assessment of church architecture Rather than a theory this method is based on case studies of contemporary buildings 1995 2015 which are often criticized for lacking theological depth In a threefold method the author brings to light the ways in which architecture can be theology or theotopy by focusing on topoi places rather than logoi words Churches reveal our relationship with God by engaging our body mind and community This method proves relevant not only for the way we perceive these buildings but also for the way we use them especially in our prophetic engagement for a better world

The Seventh Level Joe Hefferon, 2012-06-13 Do you feel a rage to achieve Are you unsure how to begin What are the secrets to building an extraordinary life What are the best methods for generating ideas formulating a plan and constructing your vision In The Seventh Level Joe Hefferon guides you through a seven step process distilled from an exploration of the world's most ingenious minds the architects of the great cathedrals and skyscrapers the visionary galleries and awe inspiring

residences Nearly every important moment of our lives is in some way connected to a built place and now that place can be you Join forces with the architects to design the life youve always dreamed of This is your pocket renaissance the new era of you the quest for that elusive seventh level Praise for The Seventh Level Leonardo da Vinci first showed us the relationship between the human body and architectural proportions Now Joe Hefferon shows us the relationship between architectural design and human experience The Seventh Level will help you become the architect of your best life Dr Wendy Walsh Human Behavior Expert     Anchoring Steven Holl,1991 One of our most popular titles Anchoring presents New York architect Steven Holl s projects from 1975 to the present Among the works featured are Void Space Hinged Space Housing Fukuoka School of Architecture University of Minnesota Pace Showroom New York StrettoHouse Dallas and the Berkowitz House Martha s Vineyard     **The Architect's Brain** Harry Francis Mallgrave,2011-05-25 The Architect s Brain Neuroscience Creativity and Architecture is the first book to consider the relationship between the neurosciences and architecture offering a compelling and provocative study in the field of architectural theory Explores various moments of architectural thought over the last 500 years as a cognitive manifestation of philosophical psychological and physiological theory Looks at architectural thought through the lens of the remarkable insights of contemporary neuroscience particularly as they have advanced within the last decade Demonstrates the neurological justification for some very timeless architectural ideas from the multisensory nature of the architectural experience to the essential relationship of ambiguity and metaphor to creative thinking     **Arquitectura, fenomenología y dialogía social. Architecture, phenomenology & social dialogics** Josep Muntanola Thornberg,2015-05 The phenomenological and social analysis of architecture and planning are not a new subject matter However a set of new conditions made them interesting again First the impact of Mikhail Bakhtin s dialogical philosophy We reproduce here the incredible text of the lecture in Barcelona June 2013 by Michael Holquist biographer translator and the best worldwide expert of Bakhtin s ideas and works This lecture is a basic text in order to understand not only Bakhtin but also the cultural meaning of architecture as such Second the tandem work by Steven Holl and Juhani Pallasmaa on the perception of human existential space See the work by our PHD student Shlomi Almador in this issue Third the need for new social phenomenology of architecture and urban planning education The bases for that are in an article devoted to Lewis Mumford legacy and published in the international review Scienze del territorio Vol 2 2014 University of Florence The volume includes a selection of communication from the last two international congresses by the architectonics network in Barcelona 2012 and 2013 We cannot publish all of them but the rest can be read in the web [www.architectonics.com](http://www.architectonics.com) ISBN 978 84 616 2928 2 ISBN 978 84 695 9424 7     **Parallax** Steven Holl,2000-11 This book takes a look at the ideas behind the architecture of Steven Holl It reveals how his sculptural form making his interest in the poetics of space colour and materiality and his fascination with scientific phenomena have made him one of the world s most esteemed architects     **Creating Through Mind and Emotions** Mário Ming Kong,Maria do Rosário Monteiro,Maria João Pereira

Neto,2022-07-01 The texts presented in Proportion Harmonies and Identities PHI Creating Through Mind and Emotions were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research This platform also aims to foster the awareness and discussion on Creating Through Mind and Emotions focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal The idea of Creating Through Mind and Emotions has been a powerful motor for development since the Western Early Modern Age Its theoretical and practical foundations have become the working tools of scientists philosophers and artists who seek strategies and policies to accelerate the development process in different contexts

**Intertwining:** Steven Holl,1996-04 To his earlier articulated concept of anchoring which connects a construction with the history of the ground locale and region Holl adds the concept of intertwining which is illuminated by sensory perceptual conceptual and emotional experiences Illustrates with drawings plans and photographs projects in Japan Finland Germany Switzerland Holland Korea and Norway No index Annotation copyright by Book News Inc Portland OR **Architectural Record** ,2006 Oz ,1997 **The Architectural Model** Matthew Mindrup,2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect s muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model s development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti s dictum that models be simple lest they distract from the architect s ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup s histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways
