painting within the context of Cezanne's artistic and psychological development and of the history of the genre of still life in France. Still life like the medium of watercolor was traditionally considered to be low in the hierarchy of French academic paintings. Cezanne chose to ignore this hierarchy creating monumental still life watercolors that contained echoes of grand landscapes and even historical paintings in the manner of Poussin the highest of classical art forms. In so doing he changed his still lifes with new meanings both in terms of his own notoriously difficult personality and in the way he used the genre to explore the very process of looking at and creating art. Carol Armstrong's study is a fascinating exploration of the brilliant watercolor paintings that brought Cezanne's career to a complex and triumphant conclusion. The book includes new photographic studies of the Getty's painting that allow the reader to encounter this great watercolor as never before in all of its richness and detail.
