Beyond the Gender Gap in Japan Gill Steel,2019-01-23 Why do Japanese women enjoy a high sense of well being in a context of high inequality Beyond the Gender Gap in Japan brings together researchers from across the social sciences to investigate this question The authors analyze women s values and the lived experiences at home in the family at work in their leisure time as volunteers and in politics and policy making Their research shows that the state and firms have blurred the public and the private in postwar Japan constraining individuals lives and reveals the uneven pace of change in women s representation in politics Yet despite these constraints the increasing diversification in how people live and how they manage their lives demonstrates that some people are crafting a variety of individual solutions to structural problems Covering a significant breadth of material the book presents comprehensive findings that use a variety of research methods public opinion surveys in depth interviews a life history and participant observation and in doing so look beyond Japan s perennially low rankings in gender equality indices to demonstrate the diversity underneath questioning some of the stereotypical assumptions about women in Japan

Women in the Arts Barbara Harbach,Diane Touliatos-Miles,2015-02-27 Is there a need for books about women in the arts exhibitions of women painters readings of women s poetry concerts of music by women composers and conferences highlighting women in the arts One might believe that today the playing field is level but categories still place the word woman before the discipline woman composer woman poet woman artist and so on The ultimate goal is to move the debate away from gender categories which reinforce the notion that men s creativity is not only

the norm but better There are many women challenging the status quo and succeeding Change comes slowly since many men and some women in positions of power do not see gender stereotyping as a problem It s been nearly a millennium since Hildegard von Bingen composed music and illuminated manuscripts Shouldn t the time when it was unusual to be a woman composer have past As the great 20th century pedagogue and composer Nadia Boulanger said I ve been a woman for a little over 50 years and have gotten over my initial astonishment As for conducting an orchestra that s a job where I don t think sex plays much part Indeed books like *Women in the Arts Eccentric Essays II* serve to bring society just a little closer to equality by keeping the accomplishments of women at the forefront of consciousness Technology today is a great asset in documenting the productivity of women and all artistic creations can be codified and archived in contrast to earlier times when creative women s birth and death dates are unknown not even taking into account all their lost creations The essays contained in *Women in the Arts Eccentric Essays II* reflect the lives of creative artists whether they are teachers scholars and researchers recovering previous generations of women artists or practicing artists creating new masterpieces The promotion of the roles of women in the arts is integral so that they may serve as a resource for future generations of students scholars and researchers and to enhance generations to come enriching culture through the arts *Civilizing Rituals* Carol Duncan,1995 This book considers the material conditions in which the production and consumption of art takes place looking at how art is presented to the community and how art museums are shaped by cultural social and political determinants

Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanaugh,2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America s logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition s inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan s inherent complexity As the critical

contradictions at the very heart of the campaign increased with the extension of the latter's duration scale and cost America's leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self-sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough

Reflecting on Darwin Eckart Voigts, Barbara Schaff, 2016-04-08 Taking up the historical evolution of Darwin and his theories and the cultural responses they have inspired *Reflecting on Darwin* poses the following questions How are the apparatuses in the mid-nineteenth century and at the turn of the twenty-first century interconnected with bio-scientific paradigms in art literature culture and science How are naturalism determinism and Darwinism the eugenics of the nineteenth century and the genetic coding of the twentieth century positioned embodied and staged in various media configurations and media genres and How have particular media apparatuses formed displaced or stabilized the various concepts of humankind in the framework of evolutionary theory

Ranging from the early circulation of Darwin's ideas to the present this interdisciplinary collection pays particular attention to Darwin's postmillennial reception Beginning with an overview of the historical development of contemporary ecological and ethical fears Reflecting on Darwin then turns to Darwin's influence on contemporary media neo Victorian literature and culture science fiction literature and film and contemporary theory In examining the plurality of ways in which Darwin has been rewritten and reappropriated this unique volume both mirrors and inspects the complexity of recent debates in Victorian and neo Victorian studies

Conformity and Conflict Dianna J. Shandy,David W. McCurdy,James P. Spradley,2023-08-17 This best selling collection of engaging articles has enlivened cultural anthropology courses for decades The lead editor of the sixteenth edition Dianna Shandy first encountered Conformity and Conflict as an undergraduate and began teaching from the book in 1999 From the first through

the sixteenth edition the editors have chosen classic works and solicited original pieces that powerfully illuminate the nature of culture and its influence on people's lives. One of the overarching principles through the years has been to include material on North American cultures so readers can make their own cultural comparisons and see the relevance of anthropology to their own lives. Readers sharpen critical thinking skills as they examine their assumptions, identify perspectives, and assess their beliefs. Selections are organized around topics found in many textbooks and courses, facilitating usage by instructors who do not want to assign a standard text. Part introductions include discussion of many basic anthropological definitions. Article introductions coherently and systematically link selections to anthropological concepts. Sections and selections include environmental, global, and practicing anthropological subfields as well as traditional interests such as language, gender, kinship, economics, politics, law, inequality, and religion. The forty readings in this collection cover a broad range of theoretical perspectives, juxtaposing classic and contemporary ethnographic work to introduce students to a broad range of authors. The selections provide a fascinating way to look at human experience and make sense of the world around us.
