Still Life In Real Time Theory After Television:

Still Life in Real Time Richard Dienst, 1994 Television can be imagined in a number of ways as a profuse flow of images as a machine that produces new social relationships as the last lingering gasp of Western metaphysical thinking as a stuttering relay system of almost anonymous messages as a fantastic construction of time Richard Dienst engages each of these possibilities as he explores the challenge television has posed for contemporary theories of culture technology and media Five theoretical projects provide *Still Life in Real Time* with its framework the cultural studies tradition of Raymond Williams Marxist political economy Heideggerian existentialism Derridean deconstruction and a Deleuzian anatomy of images Drawing lessons from television programs like *Twin Peaks* and *Crime Story* television events like the Gulf War and television personalities like Madonna Dienst produces a remarkable range of insights on the character of the medium and on the theories that have been affected by it From the earliest theorists who viewed television as a new metaphor for a global whole a liberal technology empty of ideological or any other content through those who saw it as a tool for consumption making time a commodity to those who sense television's threat to being and its intimate relation to power Dienst exposes the rich pattern of television's influence on philosophy and hence on the deepest levels of contemporary experience A book of theory *Still Life in Real Time* will compel the attention of all those with an interest in the nature of the ever present ever shifting medium and its role in the thinking that marks our time

Antisocial Media Greg Goldberg,2018-01-16 The debate surrounding the transformation of work at the hands of digital technology and the anxieties brought forth by automation the sharing economy and the exploitation of leisure We have been told that digital technology is now threatening the workplace as we know it that advances in computing and robotics will soon make human labor obsolete that the sharing economy exemplified by Uber and Airbnb will degrade the few jobs that remain and that the boundaries between work and play are collapsing as Facebook and Instagram infiltrate our free time In this timely critique Greg Goldberg examines the fear that work is being eviscerated by digital technology He argues that it is not actually the degradation or disappearance of work that is so troubling but rather the underlying notion that society itself is under attack and more specifically the bonds of responsibility on which social relations depend Rather than rushing to the defense of the social however Goldberg instead imagines the appeal of refusing the hard work of being a responsible and productive member of society **Animal Stories** Susan McHugh,2011 How cross species companionship is figured across a variety of media and why it matters

Control and Freedom Wendy Hui Kyong Chun,2008-09-26 A work that bridges media archaeology and visual culture studies argues that the Internet has emerged as a mass medium by linking control with freedom and democracy How has the Internet a medium that thrives on control been accepted as a medium of freedom Why is freedom increasingly indistinguishable from paranoid control In *Control and Freedom* Wendy Hui Kyong Chun explores the current political and technological coupling of freedom with control by tracing the emergence of the Internet as a mass medium The parallel and paranoid myths of the Internet as total freedom total control she says stem from our reduction of

political problems into technological ones Drawing on the theories of Gilles Deleuze and Michel Foucault and analyzing such phenomena as Webcams and face recognition technology Chun argues that the relationship between control and freedom in networked contact is experienced and negotiated through sexuality and race She traces the desire for cyberspace to cyberpunk fiction and maps the transformation of public private into open closed Analyzing pornocracy she contends that it was through cyberporn and the government's attempts to regulate it that the Internet became a marketplace of ideas and commodities Chun describes the way Internet promoters conflated technological empowerment with racial empowerment and through close examinations of William Gibson's *Neuromancer* and Mamoru Oshii's *Ghost in the Shell* she analyzes the management of interactivity in narratives of cyberspace The Internet's potential for democracy stems not from illusory promises of individual empowerment Chun argues but rather from the ways in which it exposes us to others and to other machines in ways we cannot control Using fiber optic networks light coursing through glass tubes as metaphor and reality *Control and Freedom* engages the rich philosophical tradition of light as a figure for knowledge clarification surveillance and discipline in order to argue that fiber optic networks physically instantiate and thus shatter enlightenment Engaging Film

Julian Wolfreys, 2017-03-14 *Victorian Hauntings* asks its reader to consider the following questions What does it mean to read or write with ghosts or to suggest that acts of reading or writing are haunted In what ways can authors in the nineteenth century be read so as to acknowledge the various phantom effects which return within their texts In what ways do the traces of such ghost writing surface in the works of Dickens Tennyson Eliot and Hardy How does the work of spectrality revenance and the uncanny transform materially both the forms of the literary in the Victorian era and our reception of it today Beginning with an expoloration of matters of haunting the uncanny the gothic and the spectral Julian Wolfreys traces the ghostly resonances at work in Victorian writing and how such persistence addresses issues of memory and responsibility which haunt the work of reading Taking the familiar genre of the Gothic as a point of departure and revisiting it through Derridean theory Wolfreys book the first application of hauntology to the domain of Victorian Studies is a remarkable achievement Wolfreys never reduces reading to instrumentality but remains alert to all the potentialities of the texts he reads with a great attention to their idiosyncrasies *Victorian Hauntings* should bring a new tone to Victorian Studies this clever book is quite perfect Jean Michel Rabate Professor of English University of

Visual Culture Revisited Ralf Adelman,Andreas Fahr,Ines Katenhusen,Nic Leonhardt,Dimitri Liebsch,2014-12-05 Is there one visual culture or are there multiple visual cultures On the one hand it is obvious that images do not exist and cannot be understood independently Rather they are embedded in institutions and cultural contexts This common ground suggests an understanding of visual culture as a singular phenomenon On the other hand the plurality of pictorial representations from Sitcoms to illustrations in childrens books from cartoons to satellite photos from high art to everyday life suggests the conception of visual culture as a singular phenomenon to be misleading The visual world is a field of conflict and tension between self and other mainstream and counterculture The articles in this book include both theoretical reflections on the dialectics of visual culture s as well as case studies The focus lies on examples from the U S American context from the focusing on Native Americans as the Vanishing Race in the 19th century Photography to the TV coverage of the Columbia Space Shuttle Disaster in February 2003 This book is therefore highly recommendable to both students and scholars of American Studies als well as those interested in the interdisciplinary debate on visual culture s

Classics and Media Theory Pantelis Michelakis,2020-04-09 Introducing a largely neglected area of existing interactions between Greco Roman antiquity and media theory this volume addresses the question of why interactions in this area matter and how they might be developed further It aims not only to promote awareness of the presence of the classics in media theory but also to encourage more media attentiveness among scholars of Greece and Rome By bringing together an international team of scholars with interdisciplinary expertise in areas ranging from classical literature and classical reception studies to art history media theory and media history film studies philosophy and cultural studies the volume as a whole engages with numerous aspects of classical Greece and Rome revolving around issues of philosophy cultural history literature aesthetics and epistemology Each chapter provides its own definition of what constitutes mediality and how it operates constructs different genealogies of the concept of the medium and engages with emergent fields within media studies that range from cultural techniques to media archaeology diagrammatology and intermediality By seeking to foreground the persistency of Greco Roman paradigms across the different strands of media theory the volume persuasively calls for a closer consideration of the conceptual underpinnings of the cultural practices around the transformation of ancient Greece and Rome into classics

The Switch Image Lorenz Engell,2021-04-22 Television is the most powerful system of images in the late 20th and early 21st centuries Nonetheless TV has attained only little philosophical attention so far especially compared to other visual media such as film This book looks at TV as what happens on the screen and beyond it which is mainly the operation of switching images It therefore proposes a new definition of TV as the first picture that can be switched on off and over which stresses that TV is more tactile than visual Through the operation of switching TV figures the world from within and as the course of its figuration This is grasped here by the term of ontography Through the ongoing interlacing and bridging of TV 1 0 the image is being switched and TV 2 0 the image is a switch TV exponentially increases the production and circulation of

images It transforms the world and itself from an analogue state to a digital one and from central perspectivism to pluri perspective In terms of time through switching and the switch it develops and reworks new temporal orderings such as instantaneity synchronicity flow and seriality TV makes its own history In space it creates a mediasphere as its habitat and hence new forms of being in the world of proximity and distance and scale Anthropologically it works on what a subject and an object is on what makes the human being and ontographically how it is possible that there is something at all instead of nothing through switch images Representing Capital Fredric Jameson, 2014-01-07 Representing Capital Fredric Jameson s first book length engagement with Marx s magnum opus is a unique work of scholarship that records the progression of Marx s thought as if it were a musical score The textual landscape that emerges is the setting for paradoxes and contradictions that struggle toward resolution giving rise to new antinomies and a new forward movement These immense segments overlap each other to combine and develop on new levels in the same way that capital itself does stumbling against obstacles that it overcomes by progressive expansions which are in themselves so many leaps into the unknown
