Stilled Tongues From Soapbox To Soundbite:

Stilled Tongues Stephen Coleman, 1997 Oratory in Action Michael Edwards, Christopher Reid, 2004-07-23 This book examines the power and possibilities of public speaking ranging from the oratory of the Athenian law courts to the political oratory of New Labour A distinctive feature of the book is its conception of the orator as a performer and practitioner and of oratory itself as a form of action Historically the power of eloquence to rouse and influence an audience made the orator a controversial figure whose rhetorical skills provoked suspicion and awe in almost equal measure These essays show how orators exploit those skills in their attempts to shape the external world of opinion and fact They also show how the speech itself may be considered as a linguistic event or way of happening which seeks to bind the orator and the audience in prized moments of connection *Cutting Across Media* Kembrew McLeod, Rudolf Kuenzli, 2011-08-05 Collection of essays by academics and artists that considers the possibilities of appropriation art the legal ramifications of such practices and the intersection of popular culture and the avant garde **Digital Storytelling, Mediatized Stories** Knut Lundby, 2008 Recent years have seen amateur personal stories focusing on me flourish on social networking sites and in digital storytelling workshops The resulting digital stories could be called mediatized stories This book deals with these self representational stories aiming to understand the transformations in the age old practice of storytelling that have become possible with the new digital media Its approach is interdisciplinary exploring how the mediation or mediatization processes of digital storytelling can be grasped and offering a sociological perspective of media studies and a socio cultural take of the educational sciences Aesthetic and literary perspectives on narration as well as questioning from an informatics perspective are also included **The free speech wars** Charlotte Lydia Riley, 2020-11-20 Who gets to exercise free speech and what happens when powerful voices think they have been silenced Assembling a diverse group of commentators activists and academics this book explores the contemporary free speech wars to try to understand how this issue has become increasingly charged It asks how the spaces and structures of speech mass media the lecture theatre the public event the political rally and the internet shape this debate The contributors examine how acts such as censorship boycotts and protests around free speech developed historically and how these histories inform the present The book explores the opposing sides in this debate beginning with a defence of speech freedoms and examining how speech has been curbed and controlled before countering this with an exploration of the way that free speech has been weaponised and deployed as a bad faith argument by people wishing to commit harm Considering two key battlefields in the free speech wars the university campus and the internet this book encourages the reader to be suspicious of the way that this topic is framed in the media today The free speech wars offers context provocation stimulation and hopefully a route through this conflict *Why We Don't Talk To Each Other Anymore* John Locke, 1999-08-31 The cyber age is robbing people of the most important aspect of communication face to face encounters and heart to heart conversations Now a professor of human communication sciences shows where community has

disappeared to and why it matters **The Aesthetics of Free Speech** J. Roberts, 2003-12-09 The Aesthetics of Free Speech Rethinking the Public Sphere is one of the first books to theoretically explore the relationship between free speech and the public sphere By drawing upon Marxist theory the author John Michael Roberts demonstrates how liberal theorists frequently construct an abstract aesthetic of rational cultivated and competent discussion which then serves as a norm through which certain utterances can be humiliated and excluded from participating fully within the public sphere However the author also shows how excluded utterances develop their own aesthetic of free speech and how this aesthetic then comes back to haunt the bourgeois public sphere **The Ethical Journalist** Tony Harcup, 2007 As one of the main scriptwriters of the two internal BBC training sessions which were produced following the Hutton inquiry I can heartily recommend this book Peter Stewart BBC Training Department Packed with illustrations of journalistic heroism and skulduggery This is an engaging and useful reference book and should become essential reading for serious students of journalism and for those who practise it Times Higher Education Supplement A must read for all journalists be they reporters editors or bloggers It is both a straightforward explanation of ethical dilemmas using real life examples and a subtle commentary on the state of British journalism British Journalism Review This engaging and accessible book cannot fail to inspire those who want to be good journalists in every sense of the word Journalism Practice Everything that journalists do has ethical implications and in this book Tony Harcup explores the range of issues likely to confront those studying journalism or training to become journalists The starting point for this engaging and innovative book is that ethical journalism is good journalism Building on the reflective and questioning approach of the author's acclaimed Journalism Principles and Practice this book discusses journalists' personal anecdotes alongside relevant critical studies by academics Original interviews include Andrew Gilligan on his meeting with weapons expert Dr David Kelly and Ryan Parry on being an undercover reporter in Buckingham Palace Informed by new research and the author's own experience within mainstream and alternative journalism The Ethical Journalist addresses topics such as trust the public interest deception news values source relationships crime reporting regulation and the Hutton inquiry This exciting new title discusses ethics as fundamental rather than as a set of problems or an added extra and it should become essential reading for everyone interested in journalism Self-Representation and Digital Culture N. Thumim, 2012-07-17 Taking a close look at ordinary people telling their own story Nancy Thumim explores self representations in contemporary digital culture in settings as diverse as reality TV online storytelling and oral histories displayed in museums **Qualitative Research in Criminology (1999)** Fiona Brookman, Lesley Noaks, Emma Wincup, 2017-12-15 Published in 1999 this text brings together detailed reflexive accounts of authors' experiences of conducting research on a variety of criminological topics The broad aim of the book is to critically review how qualitative methods can be effectively deployed in the area of criminology The conclusions reached in the text are diverse reflecting the range of qualitative methods considered and the particular criminological topics to which they are applied A common theme

throughout is that whilst qualitative research can help to provide valid and meaningful information on criminological issues researchers need to carefully reflect upon both the methodological and ethical dimensions of their work The book will appeal to those who wish to understand the experience of conducting qualitative research on aspects of crime and criminal justice This will include undergraduate and postgraduate students undertaking research for the first time as well as experienced researchers and teachers This book was originally published as part of the Cardiff Papers in Qualitative Research series edited by Paul Atkinson Sara Delamont and Amanda Coffey The series publishes original sociological research that reflects the tradition of qualitative and ethnographic inquiry developed at Cardiff The series includes monographs reporting on empirical research edited collections focussing on particular themes and texts discussing methodological developments and issues *From Public Service Broadcasting to Public Service Communications* Damian Tambini, Jamie Cowling, 2004

Televised Election Debates S. Coleman, 1999-11-25 This book examines the present and future of televised election debates from the Nixon Kennedy presidential debate of 1960 to the age of digital interactive multimedia A number of contributors from various perspectives debate producers participants and pundits and from a variety of countries Australia New Zealand Canada USA UK Israel discuss the significance of TV debates in what is the first international study of this important political phenomenon *Intersectionality and Beyond* Emily Grabham, Davina Cooper, Jane Krishnadas, Didi Herman, 2008-08-21 This collection addresses the present and the future of the concept of intersectionality within socio legal studies Intersectionality provides a metaphorical schema for understanding the interaction of different forms of disadvantage including race sexuality and gender But it also goes further to provide a particular model of how these aspects of social identity and location converge whether at the level of subjectivity everyday life in culture or in the institutional practices of state and other bodies Including contributions from a range of international scholars this book interrogates what has become a key organizing concept across a range of disciplines most particularly law political theory and cultural studies Digital Democracy Barry N. Hague, Brian D Loader, 2005-06-27 Digital Democracy considers how technological developments might combine with underlying social economic and political conditions to produce new vehicles for democratic practice The growth of new Information and Communication Technologies ICTs such as the Internet alongside growing concerns about the failure of advanced societies to live up to the democratic idea has produced much interest in the prospects for a digital democracy This book will provide invaluable reading for those studying social policy politics and sociology as well as for policy analysts social scientists and computer scientists *Newsletter* William Morris Society, 1997 **Environment and Planning** ,2006 **Whitaker's Books in Print** ,1998
