Military Assistance William H. Mott IV, 1999-10-30 This work provides a theoretical and historical examination of the relationship between provision of military assistance and success in achieving donor aims Eight case studies which include the American Revolution the Napoleonic Wars and the Vietnam War are examined to assess four prominent features of the donor recipient relationship the convergence of donor and recipient aims donor control commitment of donor military forces and coherence of donor policies and strategies As an essential part of the expanding body of multidisciplinary international scholarship this book links history and theory to policy and narrows the gap between economics political science and military strategy Each chapter refines the relevant features of the observed donor recipient relationships into a pattern for comparison with other episodes The final chapter collects the observations compares them and develops a set of uniformities that suggest a prototypical successful donor recipient relationship suitable for direct application as a policy paradigm or for theoretical investigation Mott suggests that both donor and recipient governments can use military assistance as a deliberate instrument of national policy and military strategy to achieve national aims *A Surgeon with Stilwell* Alan K.

Lathrop, 2018-10-10 United States Army surgeon John H Grindlay served in the China Burma India Theater of World War II in 1941-1944 Drawing on his unpublished war diary and letters this book sheds new light on the conduct of battlefield medicine in the tropics and provides a new perspective on such personalities as General Joseph W Stilwell the famed Burma Surgeon Dr Gordon S Seagrave and Chiang Kai shek Stilwell's famous 1942 walkout retreat from Burma to India is covered along with the 1943 Allied return to Burma to push the Japanese from the Ledo Road connecting northeast India to southwestern China

Framing China Ariane Knüsel, 2016-04-15 Framing China sheds new light on Western relations with and perceptions of China in the first half of the twentieth century In this ground breaking book Ariane Knüsel examines how China was portrayed in political debates and the media in Britain the USA and Switzerland between 1900 and 1950 By focusing on the political economic cultural and social context that led to the construction of the particular images of China in each country the author demonstrates that national interests anxieties and issues influenced the way China was framed and resulted in different portrayals of China in each country The author's meticulous analysis of a vast amount of newspaper and magazine articles commentaries editorials cartoons and newsreels that have previously not been studied before also focuses on the transnational circulation of images of China While previous publications have dealt with the occurrence of the Yellow Peril and Red Menace in particular countries Framing China reveals that these images were interpreted differently in every nation

because they both reflected and contributed to the discursive construction of nationhood in each country and were influenced by domestic issues cultural values pre existing stereotypes pressure groups and geopolitical aspirations *China Watch* John King Fairbank, 1987 America's top China watcher the renowned pundit of modern Chinese history here provides an unrivaled overview of revolutionary China and Chinese American relations His reviews and critical commentary scrutinize our always fascinated often puzzled attitude toward this newly emergent superpower John Fairbank distinguishes two major motifs in recent Chinese American connections the American expectation of highly profitable trade and investment which so far have not materialized and the deep rooted missionary impulse to give the Chinese the best of our culture which includes our efforts to promote human rights The possibility of grafting our ideas of individual endeavor and God given prerogatives onto two thousand years of Confucianism with its emphasis on duty and collective harmony seems remote In contrast the outlook for mutually enriching economic dealings is much brighter Yet Fairbank cautions that we are dealing with a huge and disoriented nation struggling to enter the modern world with its own cultural identity intact and at least in the current period with its Communist Party in power Confucian tenets still prevail theory and practice are a unity policies are a form of conduct manifesting one's character and attacks on policy equal attacks on the ruling party These writings concern China in the mind's eye of America as it is interpreted through the works of American merchants diplomats missionaries and reporters observing China's travail of revolution For generalist scholar and sage alike *China Watch* offers many insights *Washington's Taiwan Dilemma, 1949-1950* David Finkelstein, 2014-04-15 The declaration of the People's Republic of China in October 1949 presented American foreign policy officials with two dilemmas how to deal with the communist government on the mainland and what to do about Chiang Kai shek's holdout Nationalist regime on Taiwan By early 1950 these questions were pressing hard upon U S civilian and military planners and policy makers for it appeared that the Red Army was preparing to invade the island Most observers believed that nothing short of American military intervention would preclude a communist victory on Taiwan How U S officials grappled with the question of what to do about Taiwan is at the heart of this study Prior to the publication of this book much of the historical literature on this critical period in U S policy toward China concentrated on the question of relations with the new regime in Beijing A focus on those debates has largely overshadowed the concomitant policy debates that centered around the question of how to deal with the Nationalist regime on Taiwan As this study shows the two issues were inextricably linked and developing a Taiwan policy was no less difficult or controversial Heavily informed by an analysis of declassified U S government documents and other primary sources this history strongly suggests that had North Korea not invaded the south in June 1950 the U S would not have intervened to save Chiang Kai shek and Taiwan from near certain invasion Beyond the narrative itself this volume is also a case study into the complex and sometimes messy processes by which foreign policy is made It explores the tensions that existed within the Truman administration between the State Department and various newly created entities such as the Department of Defense the Joint Chiefs of Staff and the

National Security Council Indeed the history of policymaking for China and Taiwan in 1949 50 is also a case study in the early development of the post war interagency system It also underscores the tensions between the Executive and Legislative branches in the development of foreign policy The study also brings to light little discussed and often uncomfortable issues in Taiwan history some of which still have relevance to politics on the island even today These include the legacies of the Japanese colonial experience the post war Nationalist occupation and the early stirrings of the Formosan independence movement to name just a couple Today U S policy toward Taiwan remains a highly charged and fundamentally divisive issue in U S China relations especially the security dimensions of that policy And even today U S Taiwan policy is still subject to partisan politics in Washington as well as in Taipei For those who still grapple with this issue this volume presents the roots of the dilemma and essential background reading

The U.S. Army and World War II Judith Bellafaire, 1998 The U S Army and World War II is an anthology of selected papers from three international conferences held in 1990 1992 and 1994 on the Army s role in the war Taking the best from those meetings Judith L Bellafaire has organized the various presentations into four thematic categories prewar planning the home front the European theater and the Asian Pacific theaters reflecting the diversity of both the war and the interest of those seeking to understand its many facets In these carefully edited papers one will find the more conventional treatments of doctrine strategy and operations side by side with those focusing on military mobilization and procurement race and gender psychological warfare and large scale advice and assistance programs Despite significant changes in military technology and the geopolitical landscape of the world since those desperate times the human problems highlighted by the authors are not much different from many of those facing Army leaders today Although the past can never provide the specific recipes needed for the future experience has shown that both the basic ingredients and the manner in which they are prepared and processed have remained remarkably constant Those grappling with the challenges of stability operations and other contingency missions in support of the Global War on Terrorism will find this collection of readings invaluable

Perceptions of China and White House Decision-Making, 1941-1963 Adam S.R. Bartley, 2019-11-26 This book assesses and evaluates the decision making behavior of United States presidents and their chief advisers from Roosevelt to Kennedy pertaining to China Seeking to dispel with the notion that each administration sought policy outcomes on the basis of a rational decision making model Bartley highlights the contradictions of adopted presidential decision making processes and the nature of domestic politics as playing prejudicial and debilitating roles The book demonstrates that elite decision making processes interacted with assumptions made about Chinese behavior interests and attitudes only superficially and in some cases not at all Misinformation and misperception were the natural outcomes Reinforced by the politics of McCarthyism at home intellectual debate on China policy was squashed parochialism and nuance were shunned and information was closed off Ultimately a divorce between the norm of behavior and the search for rational policy was registered in each administration The net result was a lasting and destructive cognitive dissonance to fit

expectations of a China reality constructed information was ignored overlooked and distorted Offering new insights into the China policies of consecutive administrations from 1941 to 1963 this volume will be of great interest to scholars and students of American foreign policy security studies and international relations

China at War Hans van de Ven, 2018-02-12 China's mid twentieth century wars pose extraordinary interpretive challenges The issue is not just that the Chinese fought for such a long time from the Marco Polo Bridge Incident of July 1937 until the close of the Korean War in 1953 across such vast territory As Hans van de Ven explains the greatest puzzles lie in understanding China's simultaneous external and internal wars Much is at stake politically in how this story is told Today in its official history and public commemorations the People's Republic asserts Chinese unity against Japan during World War II But this overwrites the era's stark divisions between Communists and Nationalists increasingly erasing the civil war from memory Van de Ven argues that the war with Japan the civil war and its aftermath were in fact of a piece a singular process of conflict and political change Reintegrating the Communist uprising with the Sino Japanese War he shows how the Communists took advantage of wartime to increase their appeal how fissures between the Nationalists and Communists affected anti Japanese resistance and how the fractious coalition fostered conditions for revolution In the process the Chinese invented an influential paradigm of war wherein the Clausewitzian model of total war between well defined interstate enemies gave way to murky campaigns of national liberation involving diverse domestic and outside belligerents This history disappears when the realities of China's mid

century conflicts are stripped from public view China at War recovers them **Tower of Skulls** Richard B. trade As these men profited by addicting millions American churches sent missionaries in search of a myth noble Chinese peasants eager to westernize The media enthusiastically propagated this image and FDR agreed that US support for Chiang Kai shek and his glamorous American educated wife would turn China into America s best friend in Asia But Chiang was on his way out and when Mao Zedong came to power Americans were shocked wondering how we had lost China Taking us from the nineteenth century through World War II and to the origins of the Vietnam War Bradley reveals how American misconceptions about China have distorted our domestic and foreign policies and led to the avoidable deaths of millions Thrillingly told The China Mirage dynamically explores the troubled history that defines US China relations to this day A vivid bracing and careful study Bradley s valuable book offers a warning about past and future unnecessary entanglements History News Network Bradley has produced another gripping historical account with ramifications for today s world World Affairs Council The China Mirage underscored the missed opportunities in our relationship with China a lesson for our current leaders Portland Press Herald
