Stimulus Secretion Coupling In Chromaffin Cells:

Stimulus-secretion Coupling in Chromaffin Cells Kurt Rosenheck, Peter I. Lelkes, 1987 **Stimulus-secretion coupling in chromaffin cells** Kurt Rosenheck, **STIMULUS SEC COUP CHROM CELLS** Kurt Rosenheck, 1987-07-31

Mechanisms of Stimulus-secretion Coupling in Porcine Adrenal Chromaffin Cells Yanping Xu, 1992 **STIMULUS SEC COUP CHROM CELLS** Rosenheck, Lelke, 1987-07-31 **The Adrenal Medulla 1986-1988** Stephen W. Carmichael, Susan L. Stoddard, 2017-11-22 This volume provides a complete review of all the articles which have appeared in the literature since 1986 that pertain to the adrenal medulla and adrenal chromaffin. Over 1700 articles are reviewed, organized and summarized. Topics covered include the transplantation of medulla into the brain, stimulus secretion coupling, neuropeptides, enzymes of catecholamine biosynthesis, growth factors, neural regulation and clinical considerations including imaging and tumors. This book will provide interesting reading for neurobiologists, cell biologists, pathologists, diagnostic radiologists and advanced biology students. **Stimulus-secretion Coupling** W. W. Douglas, 1968 **The Adrenal Medulla, 1989-1991** Stephen W. Carmichael, Susan L. Stoddard, 1992-10-13 The Adrenal Medulla 1989-1991 offers a comprehensive review of the world literature on the adrenal medulla published during this period. The book emphasizes the role of the adrenal medulla in advancing our knowledge of neuroscience; for example, the Nobel Prize winning technique of patch clamping has been applied to stimulus secretion coupling in adrenal chromaffin cells. The book also discusses such topics as the ability to image the distribution of calcium within individual neural cells, the ability to measure individual packets of neurotransmitter as they are released from cells, and advances in the understanding of ionic channels, cell to cell interactions, cell proliferation, sympathoadrenal ontogeny, growth factors, enzymatic biosynthetic pathways, electron and proton transfer, and neural pathways. Topics covered in clinical medicine include recent progress in the transplantation of the adrenal medulla to the brain as a treatment for Parkinson's disease and the latest reports on pheochromocytoma. The Adrenal Medulla 1989-1991 is an essential book for neurobiologists, neurochemists, experimental biologists, physiologists, cell biologists and informed clinicians. Mechanochemical Processes and Proteins in Stimulus-secretion Coupling of Adrenal Medullary Chromaffin Cells Jonathan Eduard Friedman, 1985 Cell Regulation by Intracellular Signals Stephane Swillens, 2013-11-21 In 1980 the IVth International Cyclic Nucleotide Conference was held in Brussels. As this meeting attracted many investigators involved in cyclic nucleotides and calcium role in intracellular regulation, it was thought that this opportunity could be used to organize prior to the Congress an in-depth introductory course on the subject. This was carried out as a NATO Advanced Study Institute. The participants included Ph.D. students and M.D.s engaged in a research training but also fully trained and well-known researchers who wanted a refresher course on the whole subject. During the course, most of the participants and lecturers asked to be provided with a text summarizing the basic lectures of the course. This book was therefore conceived as a basic textbook on the regulation and action of intracellular signal molecules, concentrating mainly on cyclic nucleotides and

calcium It was deliberately kept at a basic level We would therefore be happy if it could be used as an introduction for interested M D s or Ph D s working in other fields or entering this field and as a general refresher for researchers interested in the subject For this reason very general schemes have been asked of the authors along with reading lists of available reviews rather than extensive bibliographies The editors should like to thank the NATO Scientific Affairs Committee for having supported the course and Mrs Gh Wilmes who prepared the manuscripts S SWILLENS J E *The Structure and Function of Nervous Tissue V5* Geoffrey Bourne,2012-12-02 *The Structure and Function of Nervous Tissue Volume V* Structure III and Physiology III covers topics relating to nerve growth factor NGF neuroglia central myelinated axon adrenal medulla and saccus vasculosus of the nervous system The book begins with the physicochemical properties of the NGF molecule followed by the neuroglial participation in the removal of debris from damaged central nervous system CNS It discusses the regional distribution and biochemical characteristics of two steroid binding systems one for estradiol and the other for corticosterone It also presents studies on split brain an expression coined by Sperry 1961 to characterize an organism whose brain has been partially divided into two by surgical transection of the commissural fibers crossing the midline in lower vertebrates mammals and primates The book ends with electrophysiological studies of learning in simplified nervous system preparations This book serves as a reference work for graduate students in a variety of disciplines and for those specializing in particular aspects of nervous tissue study **Biomedical Index to PHS-supported Research: pt.
