Teaching Against The Grain Texts For A Pedagogy Of Possibility:

Teaching Against the Grain Roger Simon, 1992-04-20 Conceiving of pedagogy as a form of cultural politics and teachers therefore as cultural workers Simon offers a fresh vision of the notion of pedagogy Grounded in an ethical and political stance devoted to the advancement of human dignity Simon reflexively considers the basis on which teachers form their own dispositions and feelings and urges them to consider not only what they might do as teachers but what social visions are supported by their practices In this in depth discussion of the requirements for a pedagogy of possibility Simon highlights the significance of his theoretical commitment as applied to educational practice To illustrate the ways that pedagogy is implicated in the construction of a social imaginary Simon explores how the substance of schooling might be recast in a way that involves the work of teaching in reconstituting a progressive moral project for education that can constitute part of a broadly based social transformation He subsequently offers a social vision on which a pedagogy of possibility might be founded and shows how schools along with other sites of cultural production may be understood as integral to the struggle to establish such a vision In addition he discusses in detail how a practice of pedagogy might be conceptualized that would help establish concrete forms of hopeful practice *The SAGE Handbook of Performance Studies* D. Soyini Madison, Judith Hamera, 2006 Publisher description

Teaching Against the Grain Roger Irwin Simon, Ontario Institute for Studies in Education, 1992

Christian and Critical English Language Educators in Dialogue Mary Shepard Wong, Suresh Canagarajah, 2009-06-25 This volume critically examines how English language teaching professionals wrestle with ideological pedagogical and spiritual dilemmas as they seek to understand the place of faith in education *Education and the Politics of Becoming* Diana Masny, David Cole, 2020-10-28 This collection examines education in the light of a politics of becoming It takes a non hierarchical transdisciplinary approach challenging the macropolitics of pre established governmental and economic agendas for education Drawing on the philosophy of Gilles Deleuze and Felix Guattari the contributors consider questions such as how education might engage a politics of becoming and how education and becoming function in a society of control Since Deleuze and Guattari contend that a society is defined by its becomings its transformations this collection asks how education itself a process in becoming may contribute collective creations to a society in continual flux The chapters bring theory and praxis together deploying power affect cartography space relationality assemblage and multiple literacies in order to experiment with music art language teacher education curriculum and policy studies This collection is an innovative resource creating an encounter with the macropolitics of education and altering teaching learning evaluation and curriculum This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education* *Inner-City Schools, Multiculturalism, and Teacher Education* Frederick L. Yeo, 2013-04-03 Focusing on the causes for the continuing marginalization of minority children this book examines inner city education its teaching practices curricular rationales perspectives of teachers and students and the institutions themselves

Making Choices for Multicultural Education Christine E. Sleeter, Carl A. Grant, 2008-10-13 Focusing on what multicultural education actually looks like in the classroom *Making Choices for Multicultural Education* Sixth Edition encourages all to examine the latest theoretical perspectives on multicultural education as well as personal beliefs about classroom diversity The authors show how schools reflect broad patterns of institutional discrimination and then offer five different approaches to addressing such problems in the classroom *Resources in Education*, 1993-07 *Narrating Transformative Learning in Education* M. Gardner, U. Kelly, 2008-02-04 This collection highlights the experiences of an international group of educators as they explore the art of teaching the philosophy of learning and the tensions of working across socially constructed borders

An/Other Praxis Herry M. Mukdani, 2013-12-01 Today's ecclesial praxis has to add something to human capacity in order for the church to envision itself whole This book addresses multiple struggles as creative acts theologically for rethinking a possibly constructive ecclesial praxis that addresses God's new creation in its relation to God's people By examining it in broader paradigms Herry Mukdani proposes an Other praxis as a critical option for ecclesial freedom An Other Praxis searches not only new impulses for theological practices but the extension of voices from the margins that have contributed both to fresh ideas and to new opportunities for life It also demands ecclesial praxis to put all existing voices into account and responsibly re-discover the subaltern or subordinated others Thus this praxis helps the subaltern communities of faith claim their own identities as border crossers in the midst of cultural and religious plurality They will be active subjects of new theological productions from and for the church They are able to prove theological creativity possible today that expands beyond its ecclesial limits An Other Praxis will be of interest to readers not merely because they want to learn something beyond the existing forms of praxis Rather it will always give them refreshing energies capable of making rich and sometimes risky responses to the ministry possible and real It will also give them attitude and perspective to improve a culturally diverse conversation in theology and thus it adds diversity in ministry and leadership in today's church
