Developing a Comprehensive Faculty Evaluation System Raoul A. Arreola, 2007 Based on thirty six years of research and experience building and operating large scale faculty evaluation systems and consulting to thousands of college and university personnel the author has established an eight step process for building a comprehensive evaluation system These steps include Determining the faculty role model Determining the faculty role model parameter values Determining roles in the faculty role model Determining role component weights Determining appropriate sources of information Determining the source impact weights Determining how information should be gathered and Completing the system by selecting or designing forms protocols and rating scales In this third edition each step including the definitions of the various roles to be

evaluated has been expanded and enhanced based on the experiences of many institutions that have followed the procedure outlined in the book. The third edition also features a new introduction, fresh research in the field, updated forms and procedures, a new detailed case study of an institution that developed a Web-enabled computer supported system based on the eight-step process, and a new body of work that defines the professoriate as a meta-profession with a rubric for defining more than twenty faculty skill sets. Readers will learn how to generate and use an overall composite rating in promotion, tenure, merit pay, and post-tenure review decisions; they will also discover the issues in designing or finding, using, and cataloging student rating forms. Sample forms, worksheets, models, and sample faculty evaluation manuals round out this practical, user-friendly handbook for anyone developing a faculty evaluation system.
