Fulfilling the Promise National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on High-School Biology Education, 1990-02-01 Why are students today not learning biology appreciating its importance in their lives or pursuing it as a career Experts believe dismal learning experiences in biology classes are causing the vast majority of students to miss information that could help them lead healthier lives and make more intelligent decisions as adults How can we improve the teaching of biology throughout the school curriculum *Fulfilling the Promise* offers a vision of what biology education in our schools could be along with practical hard hitting recommendations on how to make that vision a reality Noting that many of their recommended changes will be controversial the authors explore in detail the major questions that must be answered to bring biology education to an acceptable standard how elementary middle and high school biology education arrived at its present state what impediments stand in the way of improving biology education how to properly prepare biology teachers and encourage their continuing good performance and what type of leadership is needed to improve biology education *Improving College Biology Teaching* National Research Council (U.S.).
