and all a community that prides itself for its enlightened politics and its commitment to social change should have such a low rate of participation by women This book is an ethnographic investigation of efforts to improve the diversity in software and hackerspace communities with particular attention paid to gender diversity advocacy **Calling for Change** Sheila McIntyre, Elizabeth Sheehy, 2006-06-28 Unique in both scope and perspective Calling for Change investigates the status of women within the Canadian legal profession ten years after the first national report on the subject was published by the Canadian Bar Association Elizabeth Sheehy and Sheila McIntyre bring together essays that investigate a wide range of topics from the status of women in law schools the practicing bar and on the bench to women s grassroots engagement with law and with female lawyers from the frontlines Contributors not only reflect critically on the gains losses and barriers to change of the past decade but also provide blueprints for political action Academics community activists practitioners law students women litigants and law society benchers and staff explore how egalitarian change is occurring and or being impeded in their particular contexts Each of these unique voices offers lessons from their individual collective and institutional efforts to confront and counter the interrelated forms of systemic inequality that compromise women s access to education and employment equity within legal institutions and ultimately to equal justice in Canada Published in English Hidden in White Sight Calvin Lawrence, 2023-04-14 Artificial Intelligence was meant to be the great social equalizer that helps promote fairness by removing human bias from the equation but is this true Given that the policing and judicial systems can display human bias this book explores how the technology they use can also reflect these prejudices From healthcare services to social scoring in exams to applying for and getting loans AI outcomes often restrict those most in need of these services Through personal stories from an esteemed Black Data Scientist and AI expert this book attempts to demystify the algorithmic black box AI pervades all aspects of modern society and affects everyone within it yet its internal biases are rarely confronted This book advises readers on what they can do to fight against it including the introduction of a proposed AI Bill of Rights whilst also providing specific recommendations for AI developers and technologists <https://hiddeninwhitesight.com> **Encyclopedia of Community** DAVID LEVINSON, KAREN CHRISTENSEN, 2003-06-30 Click Additional Materials for downloadable materials and samples Incredibly this is the first encyclopedia to focus on community as concept and experience so stands alone in its field as the one title any library must buy to cover this topic Essential for all readerships CHOICEA timely comprehensive and very welcome overview of a rich and rapidly growing field of inquiry Robert D Putnam Professor at Harvard University and author of Bowling Alone With every passing minute it becomes more and more apparent that our world is one community The Encyclopedia of Community serves as recognition of this trend and as a needed resource The four volume set not only explains the emerging buzz words of community such as social capital or civic engagement but also tells many stories of community institutions that work such as public libraries Sarah Ann Long Past President 1999 2000 American Library Association As we yearn to connect with our fellow citizens during these uncertain
