Technique of Lymphography and Principles of Interpretation Hans Kuisk, 1971 Radiocontrast Agents M. Sovak, 2012-12-06 Contrast media are drugs by default Had there been no default there would be no need for a related pharmacology and thus no need for this book Radiographic contrast media CM are substances whose primary purpose is to enhance diagnostic information of medical imaging systems The position of CM in pharmacology is unique First there is the unusual requirement of biological inertness An ideal CM should be completely biologically inert i e stable not pharmacologically active and efficiently and innocuously excretable Because they fail to meet these requirements CM must be considered drugs The second unusual aspect of CM is that they are used in large quantities their annual production being measured in tens of tons It is not in spite of but because of the increased use of new radiographic systems computed tomography digital radiography etc that consumption is on the rise And it is not likely that the other emerging imaging modalities NMR ultrasonography etc will displace radiographic CM soon it is quite probable that these remarkable compounds will continue to play an active role in diagnostic imaging in the foreseeable future Medical Research in the Veterans' Administration United States.
