Quadrilingual Economics Dictionary Simon K. Kuipers, B.S. Wilpstra, 2012-12-06 This quadrilingual economics dictionary is the result of many years of work Professor Frits J de Jong gathered material for this book since the very beginning of his professional career in the final years of the forties Unfortunately the author himself was not able to see the final result of his labours in book form A mere few weeks after the completion of the manuscript in November 1976 Professor De Jong passed away As Hartog and Hennipman wrote in their memorials Frits de Jong always devoted much attention to the development of concepts and terminology Throughout his career he exhibited great determination and

perseverance in trying to achieve a clear and consistent terminology and its subsequent use in the science of economics 2 That his efforts were mainly aimed at his native language was due to the fact that a language such as Dutch which is only practiced in a small geographic area faces the danger of a large scale introduction of foreign words specifically English American German and French words in this case He always strongly resisted such a debasement of the Dutch language and sought instead to construct appropriate Dutch words for the existing English German and French ones An early example can be found in an article published in De Economist of 1950 entitled De economische terminologie in het Nederlands The Terminology of Economics in Dutch

Arbeiter und technischer Fortschritt Otto Neuloh,2013-03-09 Gedankengang und Hauptergebnisse des Forschungsberichts Das Hauptkriterium des technischen Fortschritte in der industriellen Produktion ist z Zt die Automatisierung Darunter verstehen wir die mehr oder weniger vollst ndige bertragung von bisher mit der Hand aus gef hrten Arbeitsfunktionen auf eine Maschine In der mechanischen Fer tigung denkt man dabei vornehmlich an drei Funktionen Das Einspannen und die Bearbeitung eines Werkst ckes den Transport von einem Bearbei tungsvorgang zum

anderen und die Kontrolle der Vollständigkeit und Genauigkeit der Fertigung. Die Vertragung solcher Tätigkeiten auf die Maschine kann um so vollkommener entwickelt werden, je mehr es sich um immer wiederkehrende Arbeitsfunktionen handelt. Automatisierung in diesem allgemeinen Sinne ist ein Prozess der industriellen Entwicklung, der schon vor zwei Jahrhunderten mit mehreren bahnbrechenden Erfindungen automatische Geschwindigkeitsregelung von James WATT mechanischer Webstuhl von CARTWRIGHT und lochkartengesteueter Webstuhl von JAQUARD eingeleitet wurde. Zur Zeit befinden wir uns in einer neuen Phase der Vervollkommenung, die in der mechanischen Fertigung vornehmlich jene drei Arbeitsfunktionen betrifft, von denen bereits die Rede war. Gegenüber der Einstellung der Vergangenheit zum technischen Fortschritt haben wir jedoch einen grundlegenden Unterschied zu beachten: Während früher der Mensch nur als Mitläufer der Maschine angesehen wurde, sind in der Gegenwart die Auswirkungen der Automatisierung auf die Arbeitssituation des Menschen und seine Reaktionen in den Vordergrund der öffentlichen Diskussion getreten. Aus diesem Grunde wollen wir Ergebnisse aus einer Umfrage bei einem repräsentativen Querschnitt der Bevölkerung der Bundesrepublik in den Forschungsbericht einbeziehen.
