

de análisis del rol de los centros urbanos en las regiones. Su enfoque está dirigido hacia la comprensión de los elementos urbanos que permiten establecer jerarquías entre los diversos centros por su relación con la región que éstos están sirviendo. Una segunda contribución del profesor Labasse⁹ habla del equipamiento terciario superior —definido como los servicios altamente especializados y los centros de decisión— como un elemento fundamental en la comprensión del fenómeno de jerarquización en la Europa occidental actual. Basa la zona de atracción de las metrópolis en la densidad más o menos alta de tal tipo de equipamiento en estos centros. Termina su participación con un análisis del caso de Francia en que, tomando la perspectiva histórica, expone las fluctuaciones del poder de atracción de los diversos centros actuales. Marie-Andrée Prost¹⁰ a continuación, hace una presentación crítica de los diversos métodos de jerarquización de ciudades, empleados tanto en Estados Unidos como en Francia, mediante los conceptos de base económica y dominación. Esta desarrolla un método propio de jerarquización mediante el análisis del conjunto de actividades urbanas. Los profesores Antoine y Weill¹¹ cierran la obra con una discusión muy interesante sobre la política de las metrópolis de equilibrio en Francia, como elementos que contrarresten la centralización parisiense. La forma de análisis se basa, fundamentalmente, en las relaciones entre la metrópoli y sus regiones ya que consideran la metrópoli como un todo con su región funcional por ser el elemento más dinámico de la unidad. La metodología de análisis y de exposición en sí es interesante por la claridad y sistematización con que los conceptos teóricos son llevados a la práctica.

Como se decía en un comienzo, este libro presenta los avances más recientes de los geógrafos y economistas sobre los conceptos espaciales de las actividades económicas. Parece fundamental insistir sobre la importancia que tiene el análisis de distribución espacial de la economía como complemento del estudio a nivel nacional. Sin una noción clara de ellos tendremos siempre una visión demasiado agregada de los fenómenos, aunque lleguemos a una desagregación sectorial óptima. El análisis regional toma cada día mayor relevancia en la determinación de políticas de desarrollo tanto como en los procesos de planificación en todos sus niveles.

W. PAUL STRASSMANN, *Technological Change and Economic Development: the Manufacturing Experience of Mexico and Puerto Rico*. Ithaca, Nueva York, Cornell University Press, 1968. 353 pp.

Se trata de un examen del cambio tecnológico y su relación con el desarrollo económico, mediante el análisis general del problema y a través de ejemplos extraídos de la experiencia de México y Puerto Rico, a base de una pequeña muestra de empresas. El tema es especialmente interesante porque incluye el análisis de las posibilidades de elevar la productividad
