Rational Landscapes and Humanistic Geography Edward Relph, 2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment The source of this paradox where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason But humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian These confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected Such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people This environmental humility is explored in the context of individuality of settings ways of seeing landscapes appropriation and ways of building places This title will be of interest to students of human geography
