**Technology & the West** Terry S. Reynolds, Stephen H. Cutcliffe, 1997 This broad ranging anthology provides a condensed overview of technology in Western civilization Its twenty one carefully selected articles and overview essays demonstrate the complex relationship between technological and social change from antiquity to the present Specific topics include the origins of contemporary social and political institutions in the irrigation civilizations of antiquity technology and the military popular perceptions of the early industrial revolution in Europe the difference between invention and innovation the role of government in the development of technology the nature of technical expertise and nuclear power and the environment General readers and students will find this collection accessible and engaging *Technology and Culture*, 2001

Marconi's Wireless and the Rhetoric of a New Technology Aaron A. Toscano, 2012-02-09 This book examines the discourse surrounding the wireless created by the Anglo Italian inventor Guglielmo Marconi The wireless excited early twentieth century audiences before it even became a viable black box technology The wireless adhered to modernist values speed efficiency militarization and progress Language surrounding the wireless is a form of technical communication overlooked by today s practitioners This book establishes a broader definition for technical communication by examining a selection of the discourse surrounding Marconi s wireless The book s main themes are the following 1 technical communication is all discourse surrounding technology 2 the field of technical communication or technical writing should incorporate analyses of discourse surrounding technologies into its epistemology 3 the wireless is a product of the society from which it comes early twentieth century Western civilization and 4 the discourse surrounding the wireless is infused with tropes of progress speed efficiency evolution and ahistoricity **The Routledge Research Companion to**

**Nineteenth-Century British Literature and Science** John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman **Technology and the Early Modern Self** A.

Cohen, 2009-03-02 Cohen utilizes the interdisciplinary nature of contemporary literary and cultural studies to shed new light

on the relationships between technologies and the people who used them during the early modern period *The Rise of Western Power* Jonathan Daly, 2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world The Rise of Western Power charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and industrial among others The result is a clear and engaging introduction to the history of Western civilization *Technology and the Contested Meanings of Sustainability* Aidan Davison, 2001-04-19 This transdisciplinary inquiry presents a new way of thinking about sustainability and technology that takes us beyond the familiar preoccupation with ecoefficiency and toward the contested moral question of what most nourishes our ability to care for our world In contrast to the technocratic aim of controlling a perilous future the author proposes that we develop the practical craft of sustenance Beginning with debates in environmental policy he draws upon recent philosophical interest in ecology technology and moral experience to argue that the challenge of sustainability is that of undermining those traditions that present technology as somehow external to our inherent moral ambiguity This discussion responds to the work of Langdon Winner Albert Borgmann Charles Taylor Martin Heidegger David Abram and others *A History of Technoscience* David F. Channell, 2017-06-14 Are science and technology independent of one another Is technology dependent upon science and if so how is it dependent Is science dependent upon technology and if so how is it dependent Or are science and technology becoming so interdependent that the line dividing them has become totally erased This book charts the history of technoscience from the late nineteenth century to the end of the twentieth century and shows how the military industrial academic complex and big science combined to create new examples of technoscience in such areas as the nuclear arms race the space race the digital age and the new worlds of nanotechnology and biotechnology

**Practice and the Human Sciences** Donald E. Polkinghorne, 2012-02-01 Teachers nurses psychotherapists and other practitioners of care are under pressure to substitute specific prescribed techniques in place of using their own judgment Donald E Polkinghorne assembles the case for the return to judgment based practice for the professions that engage in direct person to person interaction with those they serve Set in the larger context of the technification of society Polkinghorne draws from Weber Heidegger Ihde Bourdieu de Certeau and other philosophers to trace the advancing power of the technological worldview in Western culture and uses Aristotle Dewey and Gadamer to help make his case that we should be doing things very differently **Current Contents. Arts & Humanities** Institute for scientific information (Philadelphia, Pa)., *The Journal of American History* Organization of American historians, 1997 **The Humanities in Architectural**

**Design** Soumyen Bandyopadhyay, Jane Lomholt, Nicholas Temple, Renée Tobe, 2010-02-25 Offering an in depth consideration of the impact which humanities have had on the processes of architecture and design this book asks how we can restore the traditional dialogue between intellectual enquiry in the humanities and design creativity Written by leading academics in the fields of history theory and philosophy of design these essays draw profound meanings from cultural practices and beliefs These are as diverse as the designs they inspire and include religious mythic poetic political and philosophical references This timely and important book is not a benign reflection on humanities role in architectural design but a direct response to the increased marginalization of humanities in a technology driven world The prioritization of technology leaves critical questions unanswered about the relationships between information and knowledge transcription and translation and how emerging technologies can usefully contribute to a deeper understanding of our design culture

**Engines of the Imagination** Jonathan Sawday, 2007-11-30 Challenging the artificial divide between technological studies and cultural history *Engines of the Imagination* traces the story of the imaginative encounter with machines and machinery in the European Renaissance

Research and Development in the U.S. Army Corps of Engineers Damon Manders, 2011

*Science and Other Cultures* Sandra Harding, Robert Figueroa, 2013-10-31 In this pioneering new book Sandra Harding and Robert Figueroa bring together an important collection of original essays by leading philosophers exploring an extensive range of diversity issues for the philosophy of science and technology The essays gathered in this volume extend current philosophical discussion of science and technology beyond the standard feminist and gender analyses that have flourished over the past two decades by bringing a thorough and truly diverse set of cultural racial and ethical concerns to bear on questioning in these areas *Science and Other Cultures* charts important new directions in ongoing discussions of science and technology and makes a significant contribution to both scholarly and teaching resources available in the field

*Technology & American History* Stephen H. Cutcliffe, Terry S. Reynolds, 1997 *Technology and American History* explores the technological dimension of American life from the birth of American industry in the late eighteenth century to the massive industrial systems of the late twentieth century Emphasizing a societal context for technology this carefully organized collection demonstrates both the manner in which cultural political and economic forces shape innovation and the ways that technology has influenced society and shaped its values Individual essays explore the importance of textile manufacturing in American industrialization the role of the federal government in regulating new modes of transport the development of interchangeable parts in production the process of innovation the notion of technological systems and the relationship between technological change and work in the factory on the farm and in the home The essays were selected to be accessible to both the general reader and the undergraduate student
