Hook, 2002-11-01 In this study the views of Japan's leading experts on the globalization of Japanese business management and industrial relations explain how traditional Japanese style management is responding to the changes following the collapse of the bubble economy The areas covered include the changes made in management itself inside Japan and also how it is adapting itself when transferred overseas The book demonstrates how management is moving towards a hybrid type in overseas operations and towards a western style in Japan where contractual principles are beginning to be given greater weight *International Investment and Climate Change* Timothy Forsyth, 2014-04-08 This study based on fieldwork and case studies of southeast Asian countries shows how privatization investment and new energy technologies can be integrated to combat climate change and provide the maximum return for investors The author explains what incentives and regulatory structures are needed that do not damage local competitiveness Asserting that technology transfer is fundamental to effective policies for climate change and for economic development the text examines how the benefits can be maximized *Japanese Industrial History* Carl Mosk, 2016-09-16 A detailed examination of the industrial development of Japan since the Meiji Restoration *International Bibliography of Economics* 1994 British Library of Political and Economic Science at the London School of Economics, 1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **Historical Dictionary of Japanese Business** Stuart D.B. Picken, 2016-12-19 Japan although now listed as the world's third largest economy after that of the United States and China has been too readily dismissed in the late 20th century as a spent force This is as unfortunate as it is incorrect for a number of reasons First while the Peoples Republic of China is indeed growing and its markets are

expanding an enormous amount of the impetus for development as well as logistical support is coming from large numbers of Japanese corporations operating in the PRC Major Japanese enterprises such as Toyota Sony and Honda are already in China or are in the process of establishing a presence there The export of Japanese technology remains an important contribution to China's development The benchmark of product quality within Asia and in some areas beyond has been set by Japanese industrial standards This second edition of Historical Dictionary of Japanese Business contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 800 cross referenced entries on important personalities Japanese businesses politics and economy This book is an excellent access point for students researchers and anyone wanting to know more about Japanese Business
