The Price of Victory N A M Rodger, 2024-10-24 The final instalment of N A M Rodger's definitive authoritative trilogy on Britain's naval history At the end of the French and Napoleonic wars British sea power was at its apogee But by 1840 as one contemporary commentator put it the Admiralty was full of intellectuals becalmed in the smoke of Trafalgar How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses All the great actions are here from Navarino in 1827 won by a daringly disobedient Admiral Codrington to Jutland D Day the Battle of the Atlantic and the battles in the Pacific in 1944-45 in concert with the US Navy The development and strategic significance of submarine and navy air forces is superbly described as are the rapid evolution of ships from classic Nelsonic type to hybrid steam sail ships then armour clad and the fully armoured Dreadnoughts and beyond and weapons The social history of officers and men and sometimes women always a key part of the author's work is not neglected Rodger sets all this in the essential context of politics and geo strategy The character and importance of leading admirals Beatty Fisher Cunningham is assessed together with the roles of other less famous but no less consequential figures Based on a lifetime's learning it is the culmination of one of the most significant British historical works in recent decades Naval specialists will find much that is new here and will be invigorated by the originality of Rodger's judgements but everyone who is interested in the one of the central threads in British history will find it rewarding
