Megantz, 1996-06-22 In today's volatile fragmented technology marketplace licensing is fast becoming the intellectual property strategy of choice It affords owners a viable means of maximizing revenue while providing borrowers with cost effective relatively risk free access to the intellectual property of others But whether licensing in or licensing out the process is a complex one involving among other things extensive market research identifying prospects to sell or buy

intellectual property negotiating the best possible deal and successfully managing the relationship Until now there have been no how to guides offering clear advice and guidance through the entire licensing process Focusing on the special needs of technology based industries How to License Technology arms readers with a total blueprint for developing and implementing effective technology licensing programs Written in a practical down to earth style and using numerous real life case studies to illustrate how licensing works in various settings it takes readers from idea to deal in eight easy to understand steps How to License Technology thoroughly explains the various licensing options now available and covers all practical aspects of the licensing process
