groundbreaking study that distinguishes the natural time of the cosmos from artificial mechanistic time Reveals September 11 as the signal of the end of artificial time according to the Law of Time Long awaited sequel to the author s bestselling book The Mayan Factor Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity In Time and the Technosphere Jos Arg elles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live Arg elles defines the actual nature of time as the frequency of synchronization Applying this Law of Time to an understanding of the entire system of life on Earth he shows that in order to not destroy Earth s ability to sustain life we must change our definition of time and adopt a natural harmonic calendar based on the 13 moon 28 day cycle Until the creation of the Gregorian calendar and the 60 minute hour most of humanity lived by the 28 day cycle of natural time The adoption of artificial time has subjected us to a 12 60 time frequency that governs the entire global industrialized civilization the technosphere With the collapse of the Twin Towers on September 11 a fissure was created in this artificial technosphere opening up the noosphere Earth s mental envelope Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time Our last best chance to adopt this natural time and step into the bright new future promised by the galactic shift of 2012 is the Great Calendar Change of 2004 a new discovery based on the author s mathematical research into the Mayan calendar first begun in his landmark work The Mayan Factor In Time and the Technosphere Arg elles reveals the clear distinction between third dimensional astronomical time and the fourth dimensional synchronic order of the Law of Time which holds enormous potential for the future of humanity

Turner,2022-11-22 An in depth exploration of the history authentication and modern relevance of C dice Maya de M xico the oldest surviving book of the Americas Ancient Maya scribes recorded prophecies and astronomical observations on the pages of painted books Although most were lost to decay or destruction three pre Hispanic Maya codices were known to have survived when in the 1960s a fourth book that differed from the others appeared in Mexico under mysterious circumstances After fifty years of debate over its authenticity recent investigations using cutting edge scientific and art historical analyses determined that C dice Maya de M xico formerly known as Grolier Codex is in fact the oldest surviving book of the Americas predating all others by at least two hundred years This volume provides a multifaceted introduction to the creation discovery interpretation and scientific authentication of C dice Maya de M xico In addition a full color facsimile and a page by page guide to the iconography make the codex accessible to a wide audience Additional topics include the uses and importance of sacred books in Mesoamerica the role of astronomy in ancient Maya societies and the codex s continued relevance to contemporary Maya communities This volume is published to accompany an exhibition on view at the J Paul Getty Museum at the Getty Center from October 18 2022 to January 15 2023   **Maya Calendar Origins** Prudence M. Rice,2009-02-17 In Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In Maya Calendar Origins she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice s research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems   *The Archaeology of Measurement* Iain Morley,Colin Renfrew,2010-04-26 Explores the archaeological evidence for the development of measuring activities in numerous ancient societies and the implications of these discoveries
