Social Robots Marco Nørskov, 2017-07-05 Social robotics is a cutting edge research area gathering researchers and stakeholders from various disciplines and organizations The transformational potential that these machines in the form of for example caregiving entertainment or partner robots pose to our societies and to us as individuals seems to be limited by our technical limitations and phantasy alone This collection contributes to the field of social robotics by exploring its boundaries from a philosophically informed standpoint It constructively outlines central potentials and challenges and thereby also provides a stable fundament for further research of empirical qualitative or methodological nature *The Routledge Handbook of Technology, Crime and Justice* M. R. McGuire, Thomas Holt, 2017-02-24 Technology has become increasingly important to both the function and our understanding of the justice process Many forms of criminal behaviour are highly dependent upon technology and crime control has become a predominantly technologically driven process one where traditional technological aids such as fingerprinting or blood sample analysis are supplemented by a dizzying array of tools and techniques including surveillance devices and DNA profiling This book offers the first comprehensive and holistic overview of global research on technology crime and justice It is divided into five parts each corresponding with the key stages of the offending and justice process Part I addresses the current conceptual understanding of technology within academia and the criminal justice system Part II gives a comprehensive overview of the current relations between technology and criminal behaviour Part III explores the current technologies within crime control and the ways in which technology underpins contemporary formal and informal social control Part IV sets out some of the fundamental impacts technology is now having upon the judicial process Part V reveals the emerging technologies for crime control and justice and considers the extent to which new technology can be effectively regulated This landmark collection will be essential reading for academics students and theorists within criminology sociology law engineering and technology and computer science as well as practitioners and professionals working within and around the criminal justice system **EDUCATIONAL**
