

Técnicas de correo comercial

Se dirige a estudiantes de nivel intermedio de E.L.E. que quieren familiarizarse con el lenguaje específico de la correspondencia comercial: cómo dirigirse a una empresa para solicitar un puesto de trabajo, para hacer un pedido, para pedir informes, para hacer una reclamación, etc.

Consta de 3 partes:

- Fundamentos de la correspondencia comercial (consideraciones básicas sobre la presentación de una carta formal: disposición, formato, membrete, cuerpo...).
- 10 casos prácticos, en cada uno de los cuales se ofrece un abanico de actividades destinadas a adquirir, de forma progresiva, autonomía y destreza en la redacción y comprensión de cartas. La tarea final que cierra cada caso práctico concluye con un ejercicio de comprensión auditiva.
- Análisis de las expresiones y estructuras propias de la correspondencia comercial de algunos países de Hispanoamérica, incluyendo modelos de cartas comerciales de Argentina.

Manual de Técnicas de Venta José Manuel Santos Vázquez, 2025-08-07 El mundo de las ventas ha cambiado y el vendedor que conocemos ya tiene muy poca cabida. Aquel que se basaba en la labia fácil en la presión y en la manipulación para conseguir una firma ha sido relegado por un nuevo tipo de profesional: el consultor de soluciones. Este manual ha sido concebido y escrito precisamente para esa nueva era. No es un texto más en tu estantería; es tu campo de entrenamiento personal. Tu guía de supervivencia en un mercado que cada día se vuelve más exigente y más rápido.

Técnicas multivariantes de Interdependencia Vidal Díaz de Rada, 2018-02-01 Tres aspectos diferencian esta obra del gran número de libros publicados actualmente sobre programas de análisis de datos. En primer lugar, el objetivo fundamental no es explicar una aplicación estadística sino utilizarlo como una herramienta para solucionar problemas de investigación. Se ha empleado el mínimo aparataje matemático enfocando la exposición en los criterios de utilización de las técnicas de análisis de datos y a la interpretación de los resultados proporcionados. Este texto se centra en problemas concretos de investigación y cómo la utilización de un programa permite resolver adecuadamente el objeto central de la investigación. En esta obra se desarrollan cuatro técnicas basadas en otros tantos ejemplos: Análisis Exploratorio Factorial de Componentes Factorial de Correspondencias y Conglomerados precedidas de un capítulo sobre Análisis Exploratorio. Cada técnica se explica utilizando
