Tectonics of Circum-Pacific Continental Margins, 1990 **Tectonics of Circum-Pacific Continental Margins: Proceedings of the 28th International Geology Congress, 9-19 July, 1989. by J. Aubouin and J. Bourgois, Editors**, 1990 **Tectonics of Circum-Pacific Continental Margins** Jean Aubouin, 1990 Tectonics of Circum Pacific Continental Margins Jean Aubouin, Jacques Bourgois, 1990-12 Understanding the structure and nature of movements within the Earth's crust has become increasingly important as we try to understand the history of the Earth and try to use this knowledge as a key to events in the future This is especially relevant to those ever-increasing communities populating the edges of the Pacific Ocean This collection of papers deals with the tectonic modelling and evolution in some of the most seismically active regions in the world Structural and stratigraphical analysis together with geophysical petrological and geochemical data give us some insight into tectonic events from the past and how they affected ancient landforms and gives us a clearer understanding of earth movements and therefore allows us to predict catastrophic events such as earthquakes with greater accuracy *Accretion Tectonics in the Circum-Pacific Regions* M. Accretion Tectonics in the Circum-Pacific Regions M. Hashimoto,Seiya Uyeda,2014-01-14 Accretion collision tectonics in mobile belts is one of the most important new topics in solid earth science A special seminar on this subject the Oji International Seminar on Accretion Tectonics was held from the 10th to 16th September 1981 in Tomakomai Hokkaido Japan It was sponsored by the Japan Society for the Promotion of Science and the Fujihara Foundation of Science organizers were S Uyeda Earthquake Research Institute University of Tokyo Amos Nur Department of Geophysics Stanford University and M Hashimoto Department of Geology National Science Museum Tokyo More than fifty geoscientists thirty from Japan and twenty from abroad met together to present findings from their recent studies and exchange ideas about accretion collision phenomena in the circum Pacific mobile belts Two field days were also spent in the Horokanai area central Hokkaido to examine and the Horokanai ophiolite The the Kamuikotan high pressure metamorphic rocks latter is a fragment of ancient ocean floor crust that has been obducted onto the Kamuikotan rocks at the time of collision of the Okhotsk Micro continent with Asia The seminar was by no means a large congress However to the best of our knowledge it was the first international conference on accretion collision tectonics The meeting was highly successful and we believe that it has opened an important new era in the study of plate tectonics
