relevance is a tribute to the author and a sad indictment of contemporary politics Forbidden Fruit Mark D. Regnerus, 2009-08-19 Americans remain deeply ambivalent about teenage sexuality Many presume that such uneasiness is rooted in religion But how exactly does religion contribute to the formation of teenagers sexual values and actions What difference if any does religion make in adolescents sexual attitudes and behaviors Are abstinence pledges effective What does it mean to be emotionally ready for sex Who expresses regrets about their sexual activity and why Tackling these and other questions Forbidden Fruit tells the definitive story of the sexual values and practices of American teenagers paying particular attention to how participating in organized religion shapes sexual decision making Merging analyses of three national surveys with stories drawn from interviews with over 250 teenagers across America Mark Regnerus reviews how young people learn and what they know about sex from their parents schools peers and other sources He examines what experiences teens profess to have had and how they make sense of these experiences in light of their own identities as religious moral and responsible persons Religion can and does matter Regnerus finds but religious claims are often swamped by other compelling sexual scripts Particularly interesting is the emergence of what Regnerus calls a new middle class sexual morality which has little to do with a desire for virginity but nevertheless shuns intercourse in order to avoid risks associated with pregnancy and STDs And strikingly evangelical teens aren't less sexually active than their non evangelical counterparts they just tend to feel guiltier about it In fact Regnerus finds that few religious teens have internalized or are even able to articulate the sexual ethic taught by their denominations The only and largely ineffective sexual message most religious teens are getting is Don't do it until you're married Ultimately Regnerus concludes religion may influence adolescent sexual behavior but it rarely motivates sexual decision making *The Construction of Preference* Sarah Lichtenstein, Paul Slovic, 2006-08-28 One of the main themes that has emerged from behavioral decision research during the past three decades is the view that people's preferences are often constructed in the process of elicitation This idea is derived from studies demonstrating that normatively equivalent methods of elicitation e.g choice and pricing give rise to systematically different responses These preference reversals violate the principle of procedure invariance that is fundamental to all theories of rational choice If different elicitation procedures produce different orderings of options how can preferences be defined and in what sense do they exist This book shows not only the historical roots of preference construction but also the blossoming of the concept within psychology law marketing philosophy environmental policy and economics Decision making is now understood to be a highly contingent form of information processing sensitive to task complexity time pressure response mode framing reference points and other contextual factors
