Competition Law and Regulation in European Telecommunications Pierre Larouche,2000-05-01 Using numerous practical examples this book examines the evolution of EC telecommunications law following the achievement of liberalisation the main policy goal of the 1990s After reviewing the development of regulation in the run up to liberalisation the author identifies the methods used to direct the liberalisation process and tests their validity in the post liberalisation context A critical analysis is made of the claim that competition law will offer sufficient means to regulate the sector in the future Particular emphasis is given to the way in which EC Competition Law changed in the 1990s using the essential facilities doctrine an expansive non discrimination principle and the policing of cross subsidisation to tackle what were then thought of as regulatory matters Also examined within the work is the procedural and institutional interplay between competition law and telecommunications regulation In conclusion

Larouche explores the limits of competition law and puts forward a long term case for sector specific regulation with a precise mandate to ensure that the telecommunications sector as a whole fulfils its role as a foundation for economic and social activity Telecommunications Law and Policy Stuart Minor Benjamin,James B. Speta,2015 To access this book s 2018 Supplement please click here This book engages in advanced analysis of the key administrative constitutional and economic issues that arise in the various telecommunications settings The fourth edition has been revised to reflect the increasing importance of broadband and its regulation The book contains discussions and excerpts from legal materials to help readers understand current controversies regulatory strategies and the historical developments that led to them The authors have streamlined much of the older material to present key materials concisely and effectively Summaries and previews at the start of each set of readings help students know what to read for and questions at the end of each set encourage students to think critically about those materials The organization easily permits the selection of material for courses focused only on particular industries or only on particular types of regulation *Macao Telecom Laws and Regulations Handbook - Strategic Information and Basic Laws* IBP.
