El Cruce entre Regulación y Derecho Antitrust en el Sector de Telecomunicaciones Thatiana Rodríguez Maciel, 2020-10-14 Es sabido que una serie de mercados regulados en la Unión Europea han experimentado un proceso de liberalización que ha alterado sustancialmente su estructura económica y marco legal Desde el punto de vista institucional se ha pasado de un sistema centralizado de control sólo existía el Estado y la empresa monopolista a una multiplicidad de agentes en un entorno desregulado Pues bien no son pocos los estudios que han tratado de clarificar las fronteras entre las normas de competencia y las diferentes regulaciones sectoriales Sin embargo el presente trabajo presentada por su autora Thatiana Rodríguez Maciel para la obtención del título Oficial del Máster en Derecho Privado que cursa en la Universidad Carlos III de Madrid en el año 2010 y que obtuvo la máxima calificación por parte del tribunal que la evaluó la Matrícula de Honor se centra en uno de esos sectores regulados el de las telecomunicaciones y trata de forma individualizada determinado tipo de abuso exclusionario el estrechamiento de márgenes

Comentarios a la Ley de Tecnologías de la Información y las Comunicaciones- TIC (Ley 1341 de 2009) Varios autores, 2010-01-01 La reciente expedición de la Ley 1341 de 2009 implica una transformación radical en el sector de las telecomunicaciones al incorporar un nuevo régimen de las tecnologías de la información y las comunicaciones TIC Después de casi veinte años del estatuto anterior consagrado en el Decreto Ley 1900 de 1990 el legislador adapta el marco legal a las tendencias del derecho comparado

surgidas del desarrollo tecnológico del sector y que obligan a reconocer la realidad de la convergencia en los servicios y redes de telecomunicaciones y la convergencia en los sectores informáticos y de telecomunicaciones. Puede afirmarse que existe una modificación de fondo aunque no suficiente y que apunta a un plan ambicioso por lo menos en el marco normativo de lograr la tan ansiada finalidad social del Estado en derecho de acceso de todos los habitantes del territorio nacional al uso de estas nuevas tecnologías. Un gran cambio se observa en el nuevo ámbito de aplicación de la ley donde incorpora en forma adicional a la industria de las telecomunicaciones el sector de las tecnologías de la información y las comunicaciones TIC compuesto por las industrias manufactureras comerciales y de servicios. El libro dirigido a lectores interesados en un tema de tanta actualidad tiene como objetivo mostrar la visión y comentarios de expertos docentes nacionales y extranjeros de esta Universidad. Tomo I Modernización para el Sector TIC y sus recursos esenciales Édgar González López, Luz Mónica Herrera Zapata, Jorge Murgueitio Cabrera, Sandra Milena Ortiz Laverde, 2021-01-01. Las Tecnologías de la Información y las Comunicaciones TIC han irrumpido en forma vertiginosa en todos los sectores de la nueva sociedad de la información y del conocimiento de forma que ya no es posible entender los entornos de la sociedad actual sin analizar y comprender cómo ha sido permeada por estas tecnologías que conectan a los ciudadanos a través de las telecomunicaciones. Diez años después de expedida la Ley de TIC se reformó mediante la Ley 1978 de 2019. Estos dos acontecimientos justifican el nuevo proyecto investigativo que hoy presentamos a consideración de los lectores con el propósito de que conozcan sus contenidos, sus finalidades, sus aciertos, sus eventuales desaciertos y las mejoras que se pueden incorporar. Esta obra tiene como objetivo inicial analizar el nuevo marco normativo y las reformas introducidas con la Ley 1978 de 2019 muy orientadas al sector de las telecomunicaciones. La investigación se orienta a estudiar el derecho de la

Comentarios a la Ley General de Telecomunicaciones Javier Cremades, 2004 **Ensayo sobre la regulación tecnológica** Crisanto Plaza, 2015-01-29 Un revelador heterodoxo y detallado documento sobre Europa y su posición rezagada en el entorno digital El fulgurante crecimiento del ecosistema digital con la irrupción de sucesivas generaciones de redes de telecomunicación y su globalización están marcando el desarrollo de la sociedad contemporánea y transformando radicalmente todos los sectores económicos y nuestras vidas Una regulación de esta nueva economía es un asunto crucial para lograr un motor de progreso que favorezca la innovación atraiga inversiones y fomente el empleo En este sentido resulta imprescindible arbitrar mecanismos efectivos para liberar y encauzar todo el potencial que encierra el mundo digital Crisanto Plaza especialista en economía de las telecomunicaciones con una dilatada carrera profesional reflexiona en esta obra sobre las oportunidades y los peligros que entraña el avance de la llamada era digital en Europa ámbito en el que frente a lo que ocurre en Estados Unidos el sistema regulatorio se muestra como algo cerrado en sí mismo incapaz de oxigenarse con todo aquello que le ofrece el entorno De ahí que como concluye el autor sea indispensable potenciar el poder transformador que tienen las tecnologías de la información mediante una mejor regulación que incorpore un profundo razonamiento económico
