Telepathy In Search Of A Lost Faculty:

Telepathy; in Search of a Lost Faculty Eileen Jeanette Garrett, 1968 *Telepathy* Eileen J. Garrett, 1974

Telepathy. In Search of a Lost Faculty, Etc Eileen Jeanette GARRETT, 1941 Telepathy in search of a lost faculty Eileen J. Garrett, 1941 Neuromatic John Lardas Modern, 2021-09-29 The story Modern tells ranges from eighteenth century brain anatomies to the MRI from the spread of phrenological cabinets and mental pieties in the nineteenth century to the discovery of the motor cortex and the emergence of the brain wave as a measurable manifestation of cognition from cybernetic research into neural networks and artificial intelligence to the founding of brain centric religious organizations such as Scientology from the deployments of cognitive paradigms in electric shock treatment to the work of Barbara Brown a neurofeedback pioneer who promoted the practice of controlling one's own brainwaves in the 1970s What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses Nowhere are science and religion closer than when they try to exclude each other at their own peril

Mysticism Jess Hollenback, 1996-09-15 This sweeping study of mysticism by Jess Hollenback considers the writings and experiences of a broad range of traditional religious mystics including Teresa of Avila Black Elk and Gopi Krishna It also makes use of a new category of sources that more traditional scholars have almost entirely ignored namely the autobiographies and writings of contemporary clairvoyants mediums and out of body travelers This study contributes to the current debate about the contextuality of mysticism by presenting evidence that not only are the mystic's interpretations of and responses to experiences culturally and historically conditioned but historical context and cultural environment decisively shape both the perceptual and affective content of the mystic's experience as well Hollenback also explores the linkage between the mystic's practice of recollection and the onset of other unusual or supernormal manifestations such as photisms the ability to see auras telepathic sensitivity clairvoyance and out of body experiences He demonstrates that these extraordinary phenomena can actually deepen our understanding of mysticism in unexpected ways A unique feature of this book is its in depth analysis of empowerment an important phenomenon ignored by most scholars of mysticism Empowerment is a peculiar enhancement of the imagination thoughts and desires that frequently accompanies mystical states of consciousness Hollenback shows its cross cultural persistence its role in constructing the perceptual and existential environments within which the mystic dwells and its linkage to the fundamental contextuality of mystical experience **How to Test and Develop Your ESP** Paul Hudson, 2001-03-20 Psychic abilities such as telepathic communication clairvoyance and premonitions have intrigued believers and the curious for ages In *How to Test and Develop Your ESP* Paul Hudson provides those interested in psychic phenomena with experiments to help discover and strengthen their own skills Favoring practice over theory Hudson shares his years of research and experiments with people interested in unlocking their potential The book covers extra sensory perception as well as interpreting dreams recalling the lives of past incarnations
