R. Kitchin,2012-12-06 The modern aspiring astronomer is faced with a bewil dering choice of commercially produced telescopes including all the designs considered in the preceding chapter Yet only four decades ago the choice for a small telescope would have been between just a refrac tor and a Newtonian reflector That change has come about because of the enormous interest that has grown in astronomy since the start of the space age and with the mind boggling discoveries of the past 30 or 40 years Except for some of the very small instruments which are unfortunately often heavily promoted in general mail order catalogues camera shops and the like the optical quality of these commercially pro duced telescopes is almost uniformly excellent Although one product may be slightly better for some types of observation or more suited to the personal cir cumstances of the observer than another most of them will provide excellent observing opportunities The same general praise cannot be applied however to the mountings with which many of these telescopes are provided and those problems are covered in Chapter 6 *110 Things to See with a Telescope* John Read,2024-10 Stargazing Basics Paul E. Kinzer,2015-07-09 A simple guide to get you started in astronomy from

observing the night sky to purchasing binoculars and telescopes *Care of Astronomical Telescopes and Accessories* M. Barlow Pepin, 2006-03-30 Commercially made astronomical telescopes are better and less expensive than ever before and their optical and mechanical performance can be superb When a good quality telescope fails to perform as well as it might the reason is quite probably that it needs a little care and attention Here is a complete guide for anyone who wants to understand more than just the basics of astronomical telescopes and accessories and how to maintain them in the peak of condition The latest on safely adjusting cleaning and maintaining your equipment is combined with thoroughly updated methods from the old masters Here too are details of choosing new and used optics and accessories along with enhancements you can make to extend their versatility and useful lifetime This book is for you Really Looking after an astronomical telescope isn't only for the experts although there are some things that only an expert should attempt and every serious amateur astronomer will find invaluable information here gleaned from Barlow Pepin's many years experience working with optical instruments [Stargazing with a Telescope](#) Robin Scagell, 2005 A guide to choosing and using a telescope including details of objects to observe and information about accessories **Stargazing** Norman Lockyer, 1878
