Television And Children:

Television and Children Aimee Dorr, 1986-04 Aimee Dorr examines children's interaction with television emphasizing the child's active role in making sense of television. She discusses specific examples of programmes watched by children, the sense they make of advertising and programming, what children know about the medium, what a formal feature is, what effects television can have, how effects are studied, and what literacy curricula look like. **Television and Children** Michael J. A.

Howe, 1977 A psychologist explores the effects of violent and aggressive acts shown on television on children's behavior and attitudes towards violence. The Children's Television Community J. Alison Bryant, 2014-04-08 This volume presents an

analysis of the children's television community, the organizations, major players and approaches to programming, and offers an overview of the history, current state, and future of children's TV. The Children's Television Community is highly informative for educators, industry professionals, and practitioners in media, developmental psychology, and education.

Children and Television Norma Pecora, John P. Murray, Ellen Ann Wartella, 2009-03-04 This seminal volume is a comprehensive review of the literature on children's television covering fifty years of academic research on children and television. The work includes studies of content, effects, and policy, and offers research conducted by social scientists and cultural studies scholars. The research questions represented here consider the content of programming, children's responses to television, regulation concerning children's television, policies, issues of advertising, and concerns about sex and race stereotyping, often voicing concerns that children's entertainment be held to a higher standard. The volume also offers essays by scholars who have been seeking answers to some of the most critical questions addressed by this research. It represents the interdisciplinary nature of research on children and television and draws on many academic traditions including communication studies, psychology, sociology, education, economics, and medicine. The full bibliography is included on CD. Arguably the most comprehensive bibliography of research on children and television, this work illustrates the ongoing evolution of scholarship in this area and establishes how it informs or changes public policy, as well as defining its role in shaping a future agenda. The volume will be a required resource for scholars, researchers, and policy makers concerned with issues of children and television, media policy, media literacy, and education, and family studies. **The ACT Guide to**
