Forbidden Animation Karl F. Cohen, 2013-10-18 Tweety Bird was colored yellow because censors felt the original pink made the bird look nude. Betty Boop's dress was lengthened so that her garter didn't show. And in recent years a segment of *Mighty Mouse* was dropped after protest groups claimed the mouse was actually sniffing cocaine, not flower petals. These changes and many others like them have been demanded by official censors or organized groups before the cartoons could be shown in theaters or on television. How the slightly risqué gags in some silent cartoons were replaced by rigid standards in the sound film era is the first misadventure covered in this history of censorship in the animation industry. The perpetuation of racial stereotypes in many early cartoons is examined, as are the studios' efforts to stop producing such animation. This is followed by a look at many of the uncensored cartoons such as Lenny Bruce's *Thank You Mask Man* and Ralph Bakshi's *Fritz the Cat*. The censorship of television cartoons is next covered, from the changes made in theatrical releases shown on television to the different standards that apply to small screen animation. The final chapter discusses the many animators who were blacklisted from the industry in the 1950s for alleged sympathies to the Communist Party.

Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the *Handbook of Communication and Aging Research* captures the ever-changing and expanding domain of aging research. Since it was first recognized that there is more to social aging than demography, gerontology has needed a communication perspective. Like the first edition, this handbook sets out to demonstrate that aging is not only an individual process but an interactive one. The study of communication can lead to an understanding of what it means to grow old. We may age physiologically and chronologically, but our social aging—how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age—are phenomena achieved primarily through communication experiences. Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades, the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter. Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of

development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
