Office of Education, 1953 *Perspectives on Radio and Television* F. Leslie Smith, 1990 *Television in the Age of Radio* Philip W. Sewell, 2014-02-13 Television existed for a long time before it became commonplace in American homes Even as cars jazz film and radio heralded the modern age television haunted the modern imagination During the 1920s and 1930s U S television was a topic of conversation and speculation Was it technically feasible Could it be commercially viable What would it look like How might it serve the public interest And what was its place in the modern future These questions were not just asked by the American

public but also posed by the people intimately involved in television's creation. Their answers may have been self-serving but they were also statements of aspiration. Idealistic imaginations of the medium and its impact on social relations became a de facto plan for moving beyond film and radio into a new era. In *Television in the Age of Radio* Philip W. Sewell offers a unique account of how television came to be not just from technical innovations or institutional struggles but from cultural concerns that were central to the rise of industrial modernity. This book provides sustained investigations of the values of early television amateurs and enthusiasts, the fervors and worries about competing technologies and the ambitions for programming that together helped mold the medium. Sewell presents a major revision of the history of television, telling us about the nature of new media and how hopes for the future pull together diverse perspectives that shape technologies, industries, and audiences.

Radio and Television, 1978. *Stay Tuned* Christopher Sterling, John Michael Kittross, 2001-11-01. Since its initial publication in 1978, *Stay Tuned* has been recognized as the most comprehensive and useful single-volume history of American broadcasting and electronic media available. This third edition has been thoroughly revised and updated to bring the story of American broadcasting forward to the 21st century, affording readers not only the history of the most important and pervasive institution affecting our society but also providing a contextual transition to the Internet and other modern media. The enthusiasm of authors Christopher H. Sterling and John Michael Kittross is apparent as they lead readers through the development of American electronic mass media from the first electrical communication, telegraph and telephone, through radio and television to the present convergence of media business entities, programming and delivery systems including the Internet. Their presentation is engaging as well as informative, promoting an interest in history and making the connections between the developments of yesterday and the industry of today. Features of this third edition include chronological and topical tables of contents, new material reflecting modern research in the field, a new chapter describing historical developments from 1988 through to the current day, an expanded bibliography including Web site and museum listings, an updated and expanded glossary and chronology, and extensive statistical data of the development of television and radio stations, networks, advertising, programming, audiences, and other aspects of broadcasting. Designed for use in undergraduate and graduate courses on the history of American mass media, broadcasting, and electronic media, *Stay Tuned* also fits well into mass communication survey courses as an introduction to electronic media topics. As a chronicle of American broadcasting, this volume is also engaging reading for anyone interested in old radio, early television, and the origins and development of American broadcasting.
