Surveillance, Closed Circuit Television and Social Control Clive Norris, Jade Moran, 2016-12-05 The rise of CCTV camera surveillance in Britain has been dramatic Practically every major city now boasts a CCTV system aimed at among other things preventing detecting and reducing the fear of crime Increasingly these developments are mirrored in villages shopping malls residential estates transport systems schools and hospitals throughout the country In short for the majority of citizens it is now impossible to avoid being monitored and recorded as we move through public space Surveillance CCTV and Social Control represents the first systematic attempt to account for this phenomenon It brings together leading researchers from the fields of anthropology criminology evaluation geography sociology and urban planning to explore the development impact and implications of CCTV surveillance Accordingly attention is directed to a number of key questions How does CCTV fit with the trends of late modernity Does CCTV reduce crime or merely shift it elsewhere How should CCTV be evaluated What is the significance of CCTV for women s safety How adequate is the regulation of CCTV In the light of recent technological developments what is the future of CCTV surveillance

Spying with Maps Mark Monmonier, 2004-04 Maps as we know help us find our way around But they re also powerful tools for someone hoping to find you Widely available in electronic and paper formats maps offer revealing insights into our movements and activities even our likes and dislikes In *Spying with Maps* the mapmatician Mark Monmonier looks at the increased use of geographic data satellite imagery and location tracking across a wide range of fields such as military intelligence law enforcement market research and traffic engineering Could these diverse forms of geographic monitoring he asks lead to grave consequences for society To assess this very real threat he explains how geospatial technology works what it can reveal who uses it and to what effect Despite our apprehension about surveillance technology *Spying with Maps* is not a jeremiad crammed with dire warnings about eyes in the sky and invasive tracking Monmonier s approach encompasses both skepticism and the acknowledgment that geospatial technology brings with it unprecedented benefits to governments institutions and individuals especially in an era of asymmetric warfare and bioterrorism Monmonier frames his explanations of what this new technology is and how it works with the question of whether locational privacy is a fundamental right Does the right to be left alone include not letting Big Brother or a legion of Little Brothers know where we are or where we ve been What sacrifices

must we make for homeland security and open government With his usual wit and clarity Monmonier offers readers an engaging even handed introduction to the dark side of the new technology that surrounds us from traffic cameras and weather satellites to personal GPS devices and wireless communications *Creating Fear* David L. Altheide, The creative use of fear by news media and social control organizations has produced a discourse of fear The awareness and expectation that danger and risk are lurking everywhere Case studies illustrates how certain organizations and social institutions benefit from the exploitation of such fear construction One social impact is a manipulated public empathy We now have more victims than at any time in our prior history Another more troubling result is the role we have ceded to law enforcement and punishment we turn ever more readily to the state and formal control to protect us from what we fear This book attempts through the marshalling of significant data to interrupt that vicious cycle of fear discourse David Altheide employs a method which he calls tracking discourse to map how the nature and the extent of the use of the word fear has changed since the 1980s how the topics associated with fear the topics of media discourse have also changed over the same period for example the emphasis moves over time across AIDS crime immigrants race sexuality schools and children and how certain news sources prevail over others thus protectively insulating themselves from criticism of the premises of their discourse frames

Social Control and Self-Control Theories of Crime and Deviance L. Edward Wells, 2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi's seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency **Television and Behavior** National Institute of Mental Health (U.S.), 1982 Abstract A comprehensive report summarizes the past 10 years of research activities and findings concerning the effects of television viewing on child behavior and development Approximately 90% of all research publications on this topic appeared during this period representing over 2500 titles The report is presented in 2 volumes a summary report and technical reviews The technical reviews comprise overall comprehensive and critical syntheses of the scientific literature on specific topic areas developed by 24 researchers in this area The topic areas address such issues as cognitive and emotional aspects of television viewing television's influences on physical and mental health television as it relates to socialization and viewer's conceptions of social reality and television as an American institution The overall orientation of the report is toward research and public

health issues *Test Card F*, 1992 **Television and Behavior: Technical reviews**, 1982 Abstract A comprehensive report summarizes the past 10 years of research activities and findings concerning the effects of television viewing on child behavior and development Approximately 90% of all research publications on this topic appeared during this period representing over 2500 titles The report is presented in 2 volumes a summary report and technical reviews The technical reviews comprise overall comprehensive and critical syntheses of the scientific literature on specific topic areas developed by 24 researchers in this area The topic areas address such issues as cognitive and emotional aspects of television viewing television's influences on physical and mental health television as it relates to socialization and viewer's conceptions of social reality and television as an American institution The overall orientation of the report is toward research and public health issues *Developments in E-government* David Griffin, Philippa Trevor, Edward F. Halpin, 2007 Sets out to provide a critical evaluation of developments in e government This book examines the emerging area of e democracy in which technology is being utilized to provide a digital presence for the democratic processes of government It is a synthesis of theoretical contributions and empirical investigations *Surveillance as Social Sorting* David Lyon, 2005-08-19 The book moves the debate beyond alarmist Big Brother treatments or complacent assumptions that once fair information principles are in place all is well to a constructive and thought provoking level The Use and Abuse of Television J. Mallory Wober, 2013-06-19 A critical review of the harms and benefits of television that also examines systems for maximizing television's benefits The author breaks away from the conventional jargon of audience measurement and other traditional research methods proposing instead new and alternative European and Australian methods of evaluating programming Typical characterizations of the television screen broadly defined to include television home video movies games programs and computers as either the root of all social ills or the potential savior of society are reexamined Wober's ultimately optimistic viewpoint seeks to trigger change in the way we think about and assess television and in turn ensure that screens will serve rather than take advantage of their users Originally published in 1988 this thinking piece concerns timeless issues still of import *On Social Organization and Social Control* Morris Janowitz, 1991-05-28 In the four decades following the end of World War II Morris Janowitz 1919-88 published major works in macrosociology urban and political sociology race and ethnic relations and the study of armed forces and society His research was deeply rooted in the traditions of philosophical pragmatism and the Chicago school of sociology influences which led him to reject grand theories and mechanistic explanations of social life Yet he remained confident in the capacity of sociological reason to come to grips with central aspects of the human condition On the basis of his studies Janowitz came to believe that the transition from early to advanced industrial society radically altered institutional organization to make democratic social control more difficult though not impossible to achieve The task of his pragmatic sociology was to identify fundamental trends in the social organization of industrial societies to indicate their substantive implications for social control and to clarify realistic alternatives for

institution building which would strengthen the prospects for maintaining liberal democratic regimes In this volume James Burk selects from Janowitz s scholarly writings to provide a comprehensive overview of his wide ranging interests Organized to demonstrate the common logic of inquiry and substantive unity of Janowitz s contribution to several subfields of sociology the collection includes analyses of the concept of social control ethnic intolerance and hostility citizenship in Western societies models for urban education and the professionalization of military elites Burk provides a richly detailed critical account of Janowitz s intellectual development placing his writings in historical context and showing their continuing relevance for sociological research Useful to both students and specialists the volume is an important source for the ideas and methods of one of sociology s leading figures

Reality TV Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America
