modificado los estándares de medición de la visibilidad y de la audiencia en los medios de comunicación y por tanto las estrategias de marketing de las empresas en general. El gran reto para las empresas y para los medios sigue siendo conocer o al menos tener noticia de quién consume, cuándo y cómo. El conocimiento de la actividad del consumidor es el foco de atención de las empresas porque es la base de la competencia en el mercado. Diseñar una oferta unificada de medios significa desarrollar una ventaja competitiva. Este libro pretende dar a conocer las metodologías de medición y las estrategias de visibilidad y audiencia en los medios de comunicación sin dejar de atender a los aspectos contextuales que enmarcan este conjunto de actividades en los entornos online y offline. Está dirigido a los profesionales del ámbito de la comunicación y de la gestión estratégica de la información que trabajen en medios de comunicación, marketing, agencias de planificación de medios, agencias publicitarias, diseñadores de entornos web, webmasters, etc.

The SAGE Handbook of Television Studies

Manuel Alvarado, Milly Buonanno, Herman Gray, Toby Miller, 2014-12-09. Genuinely transnational in content as sensitive to the importance of production as consumption, covering the full range of approaches from political economy to textual analysis and written by a star-studded cast of contributors. Emeritus Professor Graeme Turner, University of Queensland. Finally we have before us a first-rate and wide-ranging volume that reframes television studies afresh, boldly synthesising debates in the humanities, cultural studies and social sciences. This volume should be in every library and media scholar's bookshelf.

Professor Ravi Sundaram, Centre for the Study of Developing Societies. Bringing together a truly international spread of contributors from across the UK, US, South America, Mexico and Australia, this Handbook charts the field of television studies from issues of ownership and regulation through to reception and consumption. Separate chapters are dedicated to examining the roles of journalists, writers, cinematographers, producers and manufacturers in the production process, whilst others explore different formats including sport, novella and soap opera, news and current affairs, music and reality TV. The final section analyses the pivotal role played by audiences in the contexts of gender, race and class and spans a range of topics from effects studies to audience consumption. The SAGE Handbook of Television Studies is an essential reference work for all advanced undergraduates, graduate students and academics across broadcasting, mass communication and media studies.

The Future of Television, Ioannis Deliyannis, 2019-03-13. This book presents a collection of chapters that focus on the convergence of television today, approached using an interdisciplinary perspective. Clearly, the importance of technological advances describes only one aspect of this evolutionary process. In this book, convergence is also examined from other equally important perspectives which include a historical case study on convergence and culture, viewer evolution and the changes that interactivity has introduced as opposed to static content. Because this publication focuses on all aspects that transform the medium, users, content, broadcasting and interactive technology, it becomes evident that convergence is a highly interdisciplinary subject that must always be addressed from various perspectives.
