Pacesetter Great Britain: National Audit Office, 2011-07-15 HM Revenue and some key principles of process improvement are not yet being applied strategically across the entire organisation and embedded into the Department's core processes PaceSetter introduced five years ago is designed to help HMRC change the way it works to deliver more for less resource The Department has pioneered the use of process improvement techniques in central government Improvements include the redesign of claim forms and the standardisation of procedures across offices The Department estimated that PaceSetter produced productivity improvements with over 400 million of resource savings and 860 million of tax yield It is not clear however if reported savings represent overall efficiency improvements in part because of the limited evidence on overall trends in business performance The PaceSetter Programme has had a small positive impact on staff engagement but overall it is still low HMRC does not have a full understanding of the costs of PaceSetter The Department decided to monitor only certain of the costs excluding the salary costs of its own PaceSetter experts NAO analysis shows a more complete assessment of costs brings the total spent on PaceSetter from 55 million to at least 115 million between 2005/06 and 2010/11 To maximise the benefits of PaceSetter the Department needs to use the Programme to help it streamline its business operations in a more strategic way **The Pacesetter** Jerry M Fisher, 2014-10-27 Who was responsible for these Great American Landmarks The Indy 500 The Dixie Highway The Lincoln Highway Miami Beach and Montauk New York

Conditionality Rachel A. Epstein,Ulrich Sedelmeier,2013-09-13 The European Union s EU membership conditionality has

been perceived as a highly effective means of influence on non member states in the run up to the 2004 and 2007 enlargements According to the incentive based explanation that dominates the literature conditionality has been particularly effective when the EU offered a credible membership incentive and when governments did not consider the domestic costs of compliance threatening to their hold on power This volume challenges much of the existing work on EU enlargement and postcommunist transition however by testing the conditionality thesis in the post accession setting Whereas a conditionality hypothesis would predict deteriorating compliance among the newest member states several contributions here actually find the opposite Enduring compliance among postcommunist states with the *acquis* as well as with less formally institutionalized EU preferences for economic liberalization and minority protection calls into question the role that conditionality plays in eliciting conformity Simultaneously support for the conditionality hypothesis in areas such as political party development and EU relations with Turkey and the western Balkans suggests conditionality's effects vary across countries and issues As the first study to systematically examine the relationship between international institutions and postcommunist states after enlargement this volume provides new insights into how external actors exercise their power in domestic politics This book was published as a special issue of the *Journal of European Public Policy*
