Steel Ships And Men Cammell Laird And Company 1824 1993:

Steel, Ships and Men Kenneth Warren, 1998-07-01 The firm of Cammell Laird originated in a boiler works in 1824 before growing and diversifying to become one of a small number of companies worldwide which could build armour and arm the largest warships from the operations of a single company group After World War I it was reconstructed as a naval and mercantile shipbuilder with important financial interests in steel and rolling stock manufacture Booming activity in World War II and continuing prosperity until the late 1950s was followed by increasing competition and deepening problems By the 1980s the firm's remaining steel interests had failed in 1993 the once great Birkenhead shipyard closed How and why did the businesses grow then experience such problems and eventually collapse This book tries to find answers **Crossing the Bar** Anthony Slaven, Hugh Murphy, 2017-10-18 This book is a collection of sixty interviews with key figures in British shipbuilding ship repair and marine engine building industries across the United Kingdom plus government and civil service members in the sector from the 1960s to the 1980s The aim of the project is to understand the economic social and political environment of the shipping industry from the perspective of those who worked in it The interviews place the twentieth century decline of British shipbuilding into a firm context The topics covered include international competition a recurring pertinent theme labour difficulties industry modernisation the attitude of shipowners the strong belief in traditional methods which kept many of those in the industry from recognising the cheaper faster and better quality work taking place overseas and leaving Britain behind ship production and production control the postwar boom shipyard overcrowding the decline of the domestic industry in favour of the international marketing weaknesses trade disputes and trade unions and nationalisation and privatisation concerns Opinions and viewpoints often conflict particularly between the perspectives of those working within the industry and the civil servants working outside of it but the interviews are presented as a unit and the reader is encouraged to draw their own conclusion The result is a unique historical archive that offers a multitude of firsthand perspectives on the British shipping decline open to interpretation by historians and future researchers It includes a preface introduction and select bibliography The interviews are grouped together by location and role Tracing Your Liverpool Ancestors Mike Royden, 2010-03-10 *Tracing Your Liverpool Ancestors* gives a fascinating insight into everyday life in the Liverpool area over the past four centuries Aimed primarily at the family and social historian Mike Royden's highly readable guide introduces readers to the wealth of material available on the city's history and its people In a series of short information packed chapters he describes in vivid detail the rise of Liverpool through shipping manufacturing and trade from the original fishing village to the cosmopolitan metropolis of the present day Throughout he concentrates on the lives of the local people on their experience as Liverpool developed around them He looks at their living conditions at poverty and the laboring poor at health and the ravages of disease at the influence of religion and migration at education and the traumatic experience of war He shows how the lives of Liverpudlians changed over the centuries and how this is reflected in the

records that have survived His useful book is a valuable tool for anyone researching the history of the city or the life of an individual ancestor Region and Strategy in Britain and Japan David J. Jeremy,2005 **The Palgrave Handbook of Artistic and Cultural Responses to War since 1914** Martin Kerby,Margaret Baguley,Janet McDonald,2018-12-05 This handbook explores a diverse range of artistic and cultural responses to modern conflict from Mons in the First World War to Kabul in the twenty first century With over thirty chapters from an international range of contributors ranging from the UK to the US and Australia and working across history art literature and media it offers a significant interdisciplinary contribution to the study of modern war and our artistic and cultural responses to it The handbook is divided into three parts The first part explores how communities and individuals responded to loss and grief by using art and culture to assimilate the experience as an act of survival and resilience The second part explores how conflict exerts a powerful influence on the expression and formation of both individual group racial cultural and national identities and the role played by art literature and education in this process The third part moves beyond the actual experience of conflict and its connection with issues of identity to explore how individuals and society have made use of art and culture to commemorate the war In this way it offers a unique breadth of vision and perspective to explore how conflicts have been both represented and remembered since the early twentieth century **Transport to Another World** Stephen DAVIES,2022-05-05 Mementoes of HMS Tamar abound in Hong Kong but what is really known about this troopship and her role in the maintenance of British imperial rule Using logbooks newspapers and numerous other sources this book pieces together the multifaceted and largely unknown history of the Tamar From her launch into service to her roles as a hospital theatre stage and transport for military personnel the Tamar carried not just people but also their mundane dreams and ambitions for friends families and staying alive Any ideas or concerns about sustaining the empire seldom featured in their minds at all but it was this empire that the Tamar served for seventy nine years steaming the equivalent of thirty two times around the Earth and transporting tens of thousands of people to what would seem to them another world In this engaging narrative the Tamar s exploits and the experiences of her crew and passengers parallel those of the British Empire and its subjects bringing to life the realities of imperial life on land and at sea As mud continues to settle over the Tamar s forgotten remains in Hong Kong s Victoria Harbour *Transport to Another World* will appeal to historians and readers interested in maritime history and colonial Hong Kong in general and makes a case for conserving the memory of a past some would prefer to forget *Sheffield's Great War and Beyond, 1916-1918* Peter Warr,2015-08-30 This book is out of the ordinary As well as describing the many changes in Sheffield between 1914 and 1918 it tells about the troubling events in following years as poverty and riots took hold It is also special in identifying hundreds of small as well as large Sheffield companies that worked to provide the necessities of war With many previously hidden facts the book describes the city s national factories the new Ministry of Munitions the government s control of companies arguments about the employment of women an increased emphasis on workers welfare the impact of

the Sheffield Committee on Munitions of War and the special contributions of the Cutlers Company Compulsory call up conscientious objectors and the work of the Sheffield Military Tribunal are also brought to life as are problems caused by a shortage of food and the eventual imposition of rationing The city s German prisoners of war are introduced as are the ravages of influenza and the terrible poverty and conflict that soon afflicted the city These local changes are presented against a background of important national events and with more than 100 original photographs

In the Shadow of the Alabama Renata Eley Long,2015-06-15 This book looks at an allegation of betrayal made against a young Foreign Office clerk Victor Buckley who it was claimed leaked privileged information to agents of the southern States during the American Civil War As a consequence the CSS Alabama narrowly escaped seizure by the British government and proceeded to wage war on American shipping Victor Buckley s background is examined against the hitherto erroneous belief that he was an insignificant member of the foreign office staff The American minister Charles Francis Adams oversees a network of spies endeavoring to prove contravention of The Foreign Enlistment Act The South s agents Captain James D Bulloch and Major Caleb Huse are the prime targets and a battle of wits ensues as Bulloch oversees construction of his ships on Merseyside A member of a prominent City family offers to enlist the help of a relative who he claims holds a confidential position in the Foreign Office The Confederate agents are soon receiving information about the status of Anglo American diplomacy and are able to outwit the Union spies and dispatch arms and supplies to the South Their coup d tat is achieved with the arrival of a message that hurries the Confederate s most formidable warship out of British waters After the escape of the Alabama the government moves to curtail Bulloch s operations When the war ends in 1865 investigations begin into the circumstances surrounding the Alabama s departure As America demands reparation evidence apparently incriminating Victor Buckley is acquired but before the claim reaches its hearing in Geneva diplomatic moves some involving Anglo American Masonic influence result in a treaty and ensure that no allegation is made against any individual member of foreign office staff Queen Victoria anxious to see the Alabama claims settled is spared embarrassment A scandal erupts in the foreign office in 1878 as a freelance clerk Charles Marvin leaks sensitive information to the press and subsequently writes of his experiences revealing much of the ethos of the office pertinent to Buckley s story The writer Arthur Conan Doyle becomes fascinated by Anglo American diplomacy and the Alabama question and soon after joining a London gentlemen s club where Buckley s alleged contact is a member writes a Sherlock Holmes story involving a Foreign Office clerk s apparent betrayal Coincidentally Conan Doyle has been acquainted with Buckley s associate some years earlier and he soon makes a thinly veiled appearance in a fictional work by England s most famous crime writer

How Britain Shaped the Manufacturing World, 1851-1951 Philip Hamlyn Williams,2022-07-28 The peoples of the British Isles gave to the world the foundations on which modern manufacturing economies are built This is quite an assertion but history shows that in the late eighteenth century a remarkable combination of factors and circumstances combined to give birth to Britain as the first manufacturing

nation Further factors allowed it to remain top manufacturing dog well into the twentieth century while other countries were busy playing catch up Through two world wars and the surrounding years British manufacturing remained strong albeit while ceding the lead to the United States This book seeks to tell the remarkable story of British manufacturing using the Great Exhibition of 1851 as a prism Prince Albert and Sir Henry Cole had conceived an idea of bringing together exhibits from manufacturers across the world to show to its many millions of visitors the pre eminence of the British 1851 was not the start but rather a pause for a bask in glory This book traces back from the exhibits in Hyde Park s Crystal Palace to identify the factors that gave rise to this pre eminence then follows developments up until the Festival of Britain exactly one century later Steam power and communication by electric telegraph both British inventions predated the Exhibition After it came the sewing machine and bicycle motor car and aeroplane but also electrical power radio and the chemical and pharmaceutical industries where Britain played a leading part

The British in Argentina David Rock,2018-11-29 Drawing on largely unexplored nineteenth and twentieth century sources this book offers an in depth study of Britain s presence in Argentina Its subjects include the nineteenth century rise of British trade merchants and explorers of investment and railways and of British imperialism Spanning the period from the Napoleonic Wars until the end of the twentieth century it provides a comprehensive history of the unique British community in Argentina Later sections examine the decline of British influence in Argentina from World War I into the early 1950s Finally the book traces links between British multinationals and the political breakdown in Argentina of the 1970s and early 1980s leading into dictatorship and the Falklands War Combining economic social and political history this extensive volume offers new insights into both the historical development of Argentina and of British interests overseas

Region and Strategy in Britain and Japan Takeshi Abe,Douglas A. Farnie,David J. Jeremy,Tetuso Nakaoka,John F. Wilson,2005-07-20 Highlighting the importance of regional and national differences in industrial development this book is a pioneering long term comparison of the two regions of Lancashire and Kansai

The Silent Deep James Jinks,Peter Hennessy,2015-10-29 The Ministry of Defence does not comment upon submarine operations is the standard response of officialdom to enquiries about the most secretive and mysterious of Britain s armed forces the Royal Navy Submarine Service Written with unprecedented co operation from the Service itself and privileged access to documents and personnel The Silent Deep is the first authoritative history of the Submarine Service from the end of the Second World War to the present It gives the most complete account yet published of the development of Britain s submarine fleet its capabilities its weapons its infrastructure its operations and above all from the testimony of many submariners and the first hand witness of the authors what life is like on board for the denizens of the silent deep Dramatic episodes are revealed for the first time how HMS Warspite gathered intelligence against the Soviet Navy s latest ballistic missile carrying submarine in the late 1960s how HMS Sovereign made what is probably the longest ever trail of a Soviet or Russian submarine in 1978 how HMS Trafalgar followed an exceptionally quiet Soviet Victor III probably

commanded by a Captain known as the Prince of Darkness in 1986 It also includes the first full account of submarine activities during the Falklands War But it was not all victories confrontations with Soviet submarines led to collisions and the extent of losses to UK and NATO submarine technology from Cold War spy scandals are also made more plain here than ever before In 1990 the Cold War ended but not for the Submarine Service Since June 1969 it has been the last line of national defence with the awesome responsibility of carrying Britain's nuclear deterrent The story from Polaris to Trident and now Successor is a central theme of the book In the year that it is published Russian submarines have once again been detected off the UK's shores As Britain comes to decide whether to renew its submarine carried nuclear deterrent The Silent Deep provides an essential historical perspective

Scott Lithgow Lewis Johnman, Hugh Murphy, 2017-10-18 This work studies the history of two major Scottish shipbuilding firms based on the River Clyde Scotts Shipbuilding and Engineering Company and Lithgows Limited It traces each firm's origin success decline and collapse and places the events into the historical context of maritime Britain The aim is to enhance the academic understanding of the cause and effect of the decline of the British shipbuilding industry delving beyond the factors of poor industrial relations international market conditions and entrepreneurial failure in search of further answers As a private company Lithgows Limited provides useful insights into company management outside of state control The authors base their analysis on the catalogued volumes of Scotts and Lithgows records though due to the large number of gaps in the data they also conducted interviews with major players in each company from the post war period Public business and banking records also provide supplementary material The book is separated into eight chapters plus a concluding ninth an appendix listing ships built by Scott Lithgow Limited between 1970 1987 and a select bibliography

Making Commercial Law Through Practice 1830-1970 Ross Cranston, 2021-05-27 Making Commercial Law Through Practice 1830 1970 adds a new dimension to the history of Britain's commerce trade manufacturing and financial services by showing how they have operated in law over the last one hundred and forty years In the main law and lawyers were not the driving force regulation was largely absent and judges tended to accommodate commercial needs so that market actors were able to shape the law through their practices Using legal and historical scholarship the author draws on archival sources previously unexploited for the study of commercial practice and the law's role in it This book will stimulate parallel research in other subject areas of law Modern commercial lawyers will learn a great deal about the current law from the story of its evolution and economic and business historians will see how the world of commerce and trade operated in a legal context

Britain at Bay Alan Allport, 2020 A sweeping groundbreaking epic that combines military with social history to illuminate the ways in which Great Britain and its people were permanently transformed by the Second World War Here is the many faceted world historically significant story of Britain at war In looking closely at the military and political dimensions of the conflict Alan Allport seeks to answer questions such as Could the war have been avoided Could it have been lost Were the strategic decisions the right ones How well did the British

organize and fight How well did the British live up to their own values What difference did the war make in the end to the fate of the nation In answering these and other essential questions he focuses unlike many historians on the human contingencies of the war looking directly at the roles of individuals and the outcomes determined by luck or chance Moreover he looks intimately at the changes in wartime and postwar British society and culture Whether discussing the mixing of classes during the war or the Labour Party movement he shows us in great detail the effects of the war again not only on an institutional but on an individual level as well For better or worse much of Britain today is ultimately the product of the experiences of 1939 1941

Arming the Western Front Roger Lloyd-Jones, M.J. Lewis, 2016-06-10 The First World War was above all a war of logistics Whilst the conflict will forever be remembered for the mud and slaughter of the Western Front it was a war won on the factory floor as much as the battlefield Examining the war from an industrial perspective Arming the Western Front examines how the British between 1900 and 1920 set about mobilising economic and human resources to meet the challenge of industrial war Beginning with an assessment of the run up to war the book examines Edwardian business state relations in terms of armament supply It then outlines events during the first year of the war taking a critical view of competing constructs of the war and considering how these influenced decision makers in both the private and public domains This sets the framework for an examination of the response of business firms to the demand for shells more shells and their varying ability to innovate and manage changing methods of production and organisation The outcome a central theme of the book was a complex and evolving trade off between the quantity and quality of munitions supply an issue that became particularly acute during the Battle of the Somme in 1916 This deepened the economic and political tensions between the military the Ministry of Munitions and private engineering contractors as the pressure to increase output accelerated markedly in the search for victory on the western front The Great War created a dual army one in the field the other at home producing munitions and the final section of the book examines the tensions between the two as the country strove for final victory and faced the challenges of the transition to the peace time economy

Shipbuilding in the United Kingdom Hugh Murphy, 2020-12-28 Shipbuilding in the United Kingdom provides a systematic historical account of the British Shipbuilders Corporation first looking at this major industry under private enterprise then under state control and finally back in private hands The chapters trace the evolution of public policy regarding shipbuilding ship repair and large marine engine building through the tenures of radically different Labour and Conservative governments and through the response of the board of the British Shipbuilders Corporation trade unions and local management also The book benefits from comprehensive archival research and interviews from the 1990s with leading players in the industry as well as politicians shipbuilders trade union leaders and senior civil servants This authoritative monograph is a valuable resource for advanced students and researchers across the fields of business history economic history industrial history labour history maritime history and British history

Matthew Fontaine Maury, Father of Oceanography John Grady, 2015-01-09 In

becoming a useful man on the maritime stage Matthew Fontaine Maury focused on the ills of a clique ridden Navy charted sea lanes and bested Great Britain's admiralty in securing the fastest safest routes to India and Australia He helped bind the Old and New worlds with the laying of the transatlantic cable forcefully advocated Southern rights in a troubled union and preached Manifest Destiny from the Arctic to Cape Horn And he revolutionized warfare in perfecting electronically detonated mines Maury's eagerness to go to the public on the questions of the day riled powerful men in business and politics and the U S Confederate and Royal navies He more than once ran afoul of Jefferson Davis and Stephen R Mallory secretary of the Confederate States Navy But through the political social and scientific struggles of his time Maury had his share of powerful allies like President John Tyler

Britain and Japan in the Twentieth Century Philip Towle, Nobuko Margaret Kosuge, 2007-04-27 After the horrors of World War II in Asia not least the systematic appalling mistreatment of Allied prisoners of war by the Japanese military few would have predicted that Britain's relationship with Japan would flourish into a booming partnership of economic interdependence by the start of the twenty first century This ambitious examination of Anglo Japanese relations over the course of the 20th century charts the fascinating history of how both nations overcame many years of prejudice and bitter conflict to form a bond fused by financial political and military cooperation In the 1930s many Japanese became convinced that their exports were being kept out of India by British tariffs and it was not until the 1980s that the British government fully accepted the futility of any protectionist impulse and encouraged Japanese companies to invest in Britain Today each country not only assists the other economically but also no longer blames the other for its own domestic problems Britain and Japan in the Twentieth Century elucidates how both nations have struggled to achieve stability and harmony in their relations with each other in the face of contrasting cultural identities

Warfare State David Edgerton, 2005-12-08 A challenge to the central theme of the existing histories of twentieth century Britain that the British state was a welfare state this book argues that it was also a warfare state which supported a powerful armaments industry This insight implies major revisions to our understanding of twentieth century British history from appeasement to wartime industrial and economic policy and the place of science and technology in government David Edgerton also shows how British intellectuals came to think of the state in terms of welfare and decline and includes a devastating analysis of C P Snow's two cultures This groundbreaking book offers a new post welfarist and post declinist account of Britain and an original analysis of the relations of science technology industry and the military It will be essential reading for those working on the history and historiography of twentieth century Britain the historical sociology of war and the history of science and technology
