Alexander Sens,2020-11-19 This edition with commentary covers a wide selection of Hellenistic epigrams in a way suitable for both students and scholars **Evil and Death** Beate Ego,Ulrike Mittmann,2015-09-25 Jewish anthropological beliefs

during the Hellenistic Roman period are an important but previously neglected area of biblical exegesis and Jewish studies In an effort to address this deficiency this volume brings together 20 essays related to the subject of sin and death with special emphasis on integrating material from neighboring cultures Thus the volume provides an exemplary foundation for further research on ancient Jewish anthropology **Pseudo-Euripides, "Rhesus"** Almut Fries,2014-10-14 The pseudo Euripidean

Rhesus is the only extant Greek tragedy based on an episode from Homer's Iliad and a unique witness for the history of the genre in the 4th century BC This new edition with introduction and commentary discusses textual problems language metre and dramaturgy as well as the mythological and literary historical background of the play It is an indispensable aid for serious students of the text **Reading the Way to the Netherworld** Ilinca Tanaseanu-Döbler, Gabriela Ryser, 2016-12-05

The volume focuses on the various representations of the Beyond in later Antiquity a period of intense interaction and competition between various religious traditions and ideals of education The concepts and images clustering around the Beyond form a crucial focal point for understanding the dynamics of religion and education in later Antiquity Although Christianity gradually supersedes the pagan traditions the literary representations of the Beyond derived from classical literature and transmitted through the texts read at school show a remarkable persistence they influence Christian late antique writers and are still alive in medieval literature of the East and West A specifically Christian Beyond develops only gradually and coexists subsequently with pagan ideas which in turn vary according to the respective literary and philosophical contexts Thus the various conceptualisations of the great existential unknown serves here as a point of reference for mirroring the changes and continuities in Imperial and Late Antique religion education and culture and opening up further perspectives into the Medieval world *Hesperos* P. Stenger, 2018-12-07 Education in

the Graeco Roman world was a hallmark of the polis Yet the complex ways in which pedagogical theory and practice intersected with their local environments has not been much explored in recent scholarship Learning Cities in Late Antiquity suggests a new explanatory model that helps to understand better how conditions in the cities shaped learning and teaching and how in turn education had an impact on its urban context Drawing inspiration from the modern idea of learning cities the chapters explore the interplay of teachers learners political leaders communities and institutions in the Mediterranean polis with a focus on the well documented city of Gaza in the sixth century CE They demonstrate in detail that formal and informal teaching as well as educational thinking not only responded to specifically local needs but also exerted considerable influence on local society With its interdisciplinary and comparatist approach the volume aims to contextualise ancient education in order to stimulate further research on ancient learning cities It also highlights the benefits of historical research to theory and practice in modern education **Roman Phrygia** Peter Thonemann, 2013-08-29 The first synthesis of the
