Sexual and Reproductive Health and Rights of Women in Africa and the Caribbean Zainab Monisola Olaitan, Tinuade Adekunbi Ojo, Shakira Maxwell, 2025-07-31 In a time of global backlash against women's rights and gender issues this book echoes the importance of protecting the sexual and reproductive health and rights of women by conceptualising and analysing relevant sexual and reproductive health rights issues SRHR in Africa and the Caribbean It examines the linkages that exist around SRHR issues between the two regions and how this understanding can help to support the protection of sexual and reproductive health and rights both in Africa and the Caribbean It focuses on providing historical conceptual and contextual understandings of SRHR issues in the African continent and the Caribbean region The main topics engage theoretical and contemporary issues e.g limitations to the single use of courts as avenues for reducing obstetric violence abortion rights maternal mortality gender based violence and adolescent sexuality The book presents diverse perspectives in the examination of SRHR issues by offering legal socio political and medical frameworks for analysing and understanding sexual and reproductive health and rights It further contributes to the discourse and strategies to protect the sexual and reproductive health and rights of women and men to improve both women's and men's quality of life well being and to also achieve gender equality

Learning Progressions in Science Alicia C. Alonzo, Amelia Wenk Gotwals, 2012-07-30 Learning progressions descriptions of increasingly sophisticated ways of thinking about or understanding a topic National Research Council 2007 represent a promising framework for developing organized curricula

and meaningful assessments in science. In addition, well-grounded learning progressions may allow for coherence between cognitive models of how understanding develops in a given domain, classroom instruction, professional development, and classroom and large-scale assessments. Because of the promise that learning progressions hold for bringing organization and structure to often disconnected views of how to teach and assess science, they are rapidly gaining popularity in the science education community. However, there are significant challenges faced by all engaged in this work. In June 2009, science education researchers and practitioners as well as scientists, psychometricians, and assessment specialists convened to discuss these challenges as part of the Learning Progressions in Science (LeaPS) conference. The LeaPS conference provided a structured forum for considering design decisions entailed in four aspects of work on learning progressions: defining learning progressions, developing assessments to elicit student responses relative to learning progressions, modeling and interpreting student performance with respect to a learning progression, and using learning progressions to influence standards, curricula, and teacher education. This book presents specific examples of learning progression work and syntheses of ideas from these examples and discussions at the LeaPS conference.
