Stereoviews Their Realized Prices:

Stereoviews, Their Realized Prices Doc Boehme, 2005 Within this book are realized values from auctions The function of this book is to estimate auction values estimating the value of your collection for insurance purposes and for your own personal use When we designed this there were so many ways it could have been catalogued We choose to exclude stereoviews that did not meet the following criteria A value under 50 00 US dollars and a view that does not have a card number descriptions were too long to use etc For values under 50 please refer to *Stereo Views An Illustrated History and Price Guide* written by John Waldsmith We know by excluding stereoviews without card numbers that a good majority of expensive views will never make it to this list For example there are so many different views of the same subject by the same photographer The only true way to catalog these stereoviews is to publish a price guide with pictures Photographer refers to the reference the card makes Because of pirating and people like Anthony who published many other people's views we cannot keep track of all negatives Mount and photograph ratings are as follows F G G G G VG VG VG EXC worst best Twelve years ago when I first started collecting final sale prices of stereoviews I was doing this for myself Some of the earliest entries I didn't write down the card title merely a general description of the card You will find a few vague title entries from twelve years ago If you have the actual title I will gladly accept it to update this book We also accept new entries Please include photocopies of the original listings and prices realized or a copy of the receipt detailing the transaction We enter listings from the E Bay auction website because those cards are not graded in a standardized fashion they are the first items to be removed from the list They exist only on the list as a reference point for future auctions We cannot be held responsible for misprints or actions that lead from the use of this price list Market conditions can fluctuate greatly the most recent realized value is listed The true value of any view is what the buyer is willing to pay for it and respectively what the seller is willing to sell it for Thus making some views priceless Quarterly updates are available at 15 00 each Standard U S postage is included in the purchase price PO Box 326 Osakis MN 56360

Collectors' Guide to Nineteenth-century Photographs

William Welling, 1976 **Stereoviews, Their Realized Prices** San Gutierrez-Green, 2005-09-01 The Colors In My Garden is a color illustrated story about a boy approximately five years of age and his awareness of the concepts same and different especially as they relate to his family Zachary a bright and precocious young man is beginning to express very negative feelings to his mother and grandmother about his appearance and how other people are making him feel Thanks to his grandmother listening to his concerns and giving him quality time Zachary discovers for himself that we're all special and that our differences add to the unique people we are Zachary also learns we blend together to make a beautiful picture

AB Bookman's Weekly, 1991 **The World of Stereographs** William Culp Darrah, 1977 An exact reprint edition of the definitive work on stereographs originally published by the author in 1977 Intended as a survey and guide to stereographs it considers them from four points of view historical geographical topical and by the photographers who

produced them Two checklists include the names and locations of 3500 North American stereographers arranged alphabetically by states and a world register of 4200 cited photographers giving the countries and approximate dates of activity with references to the pages of the book on which they are cited Three hundred illustrations of stereographs supplement the text

Not White Enough Muriel J Morris, 2023-05-25 When Muriel Morris delved into her family genealogy she never expected it to change her life As it turns out Morris s great great grandparents Walter Bentley Woodbury and his Javanese Eurasian wife Marie had been erased from her family history Not only did Morris discover that she was 1/32nd Indonesian but investigating her truncated family tree led her to wonder if racism was the reason Walter Woodbury s genius as an inventor never truly came to fruition You probably don t know who Walter Bentley Woodbury is but you should He s the reason this book is in your hands Woodbury invented and patented the first photographic printing press so that thousands of copies could be made from a single negative enough for a book or an illustrated magazine But he s unknown In fact he died in so much debt that a collection had to be taken for his funeral and he left his wife and eight children 246 His obscurity is due to two factors One is Woodbury himself his mercurial mind caromed on to the next project whether it was an aerial observation camera for the military or a train signal that used sound for foggy weather or paper backed film before he had secured the business side of his existing inventions The second was that he and his family were ostracized because Marie Woodbury his Eurasian wife was visibly biracial and so were most of their children The scientific community accepted Woodbury as an inventor but the wider community never accepted his wife and family virtually all of whom left England after Woodbury s tragic death This book tells a story that needs telling in our modern world Not White Enough is largely dedicated to Woodbury s career and travels but the author also sheds some light sometimes speculative on his wife their eight children and other little known Woodbury family members in an effort to piece together the puzzle of her family s fascinating and often tragic past

Walpole, 2017-01-31 Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels 129 men and three years worth of provisions. None were seen again until nearly a decade later when their bleached bones, broken instruments, books, papers, and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own: photographed, analyzed, cataloged, and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus. The Photo-beacon, 1898
