15 elasticity mit mathematics - Jul 06 2023

when an elastic material is deformed due to an external force it experiences internal resistance to the deformation and restores it to its original state if the external force is no longer applied there are various elastic moduli such as young's modulus the shear modulus and the bulk modulus all of which are measures of the inherent elastic properties of a material as a resistance to deformation under an applied load the various moduli apply to different kinds of deformation
