## Still More Wandering Thoughts:

*Distraction* Natalie M. Phillips, 2016-09-13 Enlightenment writers fiercely debated the nature of distraction in literature. Early novel reading typically conjures images of rapt readers in quiet rooms but commentators at the time described reading as a fraught activity one occurring amidst a distracting cacophony that included sloshing chamber pots and wailing street vendors. Auditory distractions were compounded by literary ones as falling paper costs led to an explosion of print material forcing prose fiction to compete with a dizzying array of essays, poems, sermons, and histories. In *Distraction* Natalie M. Phillips argues that prominent Enlightenment authors from Jane Austen and William Godwin to Eliza Haywood and Samuel Johnson were deeply engaged with debates about the wandering mind even if they were not equally concerned about the problem of distractibility. Phillips explains that some novelists in the 1700s, viewing distraction as a dangerous wandering from singular attention that could lead to sin or even madness, attempted to reform diverted readers. Johnson and Haywood, for example, worried that contemporary readers would only focus long enough to look into the first pages of essays and novels. Austen offered wry commentary on the issue through the creation of the daft Lydia Bennet, a character with an attention span so short she could listen only half a minute. Other authors radically redefined distraction as an excellent quality of mind, aligning the multiplicity of divided focus with the spontaneous creation of new thought. Laurence Sterne's *Tristram Shandy*, for example, won audiences with its comically distracted narrator and uniquely digressive form. Using cognitive science as a framework to explore the intertwined history of mental states, philosophy, science, and literary forms, Phillips explains how arguments about the diverted mind made their way into the century's most celebrated literature. She also draws a direct link between the disparate theories of focus articulated in eighteenth-century literature and modern experiments in neuroscience, revealing that contemporary questions surrounding short attention spans are grounded in long conversations over the nature and limits of focus. *Our Missions*, 1902 *The Golden Rule and Odd-fellows Family Companion*, 1846 **The Astral**

The Elizabethan Mind Helen Hackett, 2022-07-12 The first comprehensive guide to Elizabethan ideas about the mind. What is the mind? How does it relate to the body and soul? These questions were as perplexing for the Elizabethans as they are for us today, although their answers were often startlingly different. Shakespeare and his contemporaries believed the mind was governed by the humours and passions and was susceptible to the Devil's interference. In this insightful and wide

ranging account Helen Hackett explores the intricacies of Elizabethan ideas about the mind This was a period of turbulence and transition as persistent medieval theories competed with revived classical ideas and emerging scientific developments Drawing on a wealth of sources Hackett sheds new light on works by Shakespeare Marlowe Sidney and Spenser demonstrating how ideas about the mind shaped new literary and theatrical forms Looking at their conflicted attitudes to imagination dreams and melancholy Hackett examines how Elizabethans perceived the mind soul and self and how their ideas compare with our own *The Miscellaneous Works of William Hazlitt* William Hazlitt,1876 *Hibernia* George Watertown,2023-04-07 Reprint of the original first published in 1871 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost *The Irish Chieftain; Or, the Isles of Life and Death* Edward Maturin,1848 **The poetical works of John Milton, ed. with a critical memoir by W.M.
