## **Teaching And Learning At A Distance Foundation Of Distance Education:**

*Teaching and Learning at a Distance* Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field

**Teaching and Learning at a Distance** Michael R. Simonson, Sharon Smaldino, Michael Albright, Susan Zvacek, 2012 Teaching and Learning at a Distance Foundations of Distance Education Fifth Edition provides its readers with the most comprehensive coverage on the market today of information about distance education in the 21st century Primarily written for pre service teachers corporate trainers and staff development programs that discuss teaching distant learners or managing distance education systems Readers will be better equipped with the knowledge and ability to select appropriate strategies for teaching the distant learner and how to implement this new knowledge in a distance learning program so important to today s educational culture *Teaching and Learning at a*

*Distance* Michael R. Simonson, 2006 This book provides a research based exploration of distance education which covers both foundations and applications The third edition of *Teaching and Learning at a Distance* Foundations of Distance Education now emphasizes the importance of Internet based instruction in providing you with the basics you need to become a knowledgeable distance educator including theory and research that inform distance learning practical skills and knowledge needed to function immediately in a distance learning environment and managerial and administrative issues that arise in the distance learning environment Inservice Teachers and Instructional Designers Trainers *Teaching and Learning at a Distance* Michael R. Simonson, 2003 The second edition of this leading book offers everything readers need to know in order to make the experience of the distance learner as complete and satisfying as that of the local learner Here is concise to the point coverage of the foundations of the field and how it came to be dominated by the World Wide Web and the Internet And here is expansive practical hands on instruction in exactly how to do distance teaching through computer technology videotape or simple audio techniques Increased coverage of online learning provides specifics on designing delivering and evaluating online learning in every chapter Moreover the authors cover such hard to address topics as copyright protection and plagiarism and offer treatment of multiple instructional models suitable for distance education For distance teachers and learners

**Foundations of Distance Education** Desmond Keegan, 2013-12-19 Distance education and training provision has expanded dramatically over the past few years This best selling introduction to the field has helped many to understand the origins and background of distance education and has been used by students and professionals as a guide to policy and practice It has now been updated in the light of the developments in recent years in Eastern Europe and the enormous advances in the use of new technologies A new case study of distance education in China is also included *Teaching and Learning at a Distance* Michael Simonson, Susan Zvacek, 2024 *Teaching and Learning at a Distance* is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of *Teaching and Learning at a Distance* we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in *Teaching and Learning at a Distance* are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of

Teaching and Learning at a Distance is derived from Richard Clark's famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book but is also fundamental to the book's advocacy for distance education. In other words, we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn. Distance delivered instruction is not a magical approach that makes learners achieve more. Equivalency theory is the fourth theme of the book. Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive; that it should cover as much of the various ways instruction is made available to distant learners as is possible. It can serve as a stand-alone source of information.

The Foundations of Distance Education Desmond Keegan, 1986      **Distance Education** John R. Verduin, Jr., Thomas A. Clark, 1991-02-14

Distance Education gives adult educators in a range of fields from higher education to the military a comprehensive reference for developing creative nontraditional approaches to learning by using a variety of media in a wide range of settings. It presents an innovative approach to distance instruction based on learning objectives.

**Distance Learning** Marcia L. Williams, Kenneth Paprock, Barbara Covington, 1999

The landscape for higher education is changing rapidly and distance learning is a key element in this upheaval. In this practical and timely volume, authors Marcia L. Williams, Kenneth Paprock, and Barbara Covington provide clear commentary on the basic issues surrounding distance learning. Distance Learning answers some of the key questions at the heart of new educational technologies: What are the options available to institutions considering the addition of distance learning to their programs? What is the most practical way to integrate new technologies with existing equipment? For teachers, what is the best way to minimize the loss of content and foster a positive learning environment without face-to-face contact? An ideal introduction to the world of new educational technologies, the guide is filled with case studies and built on an intuitive set of How do I questions. Providing a strong foundation for teachers who need to teach from a distance, it will be an invaluable sourcebook for teachers who need to know more about open and distance learning across any academic discipline.

*Handbook of Distance Education* Michael Grahame Moore, William G. Anderson, 2003-04-02

The second edition of this award-winning book continues the mission of its predecessor to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant development in education over the past quarter century. While the book deals with education that uses technology, the focus is on teaching and learning and how its management can be facilitated through technology. This volume will be of interest to anyone engaged in distance education at either the K-12 or college level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments.

This book delves into Teaching And Learning At A Distance Foundation Of Distance Education. Teaching And Learning At A Distance Foundation Of Distance Education is a crucial topic that must be grasped by everyone, from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Teaching And Learning At A Distance Foundation Of Distance Education, encompassing both the fundamentals and more intricate discussions.

1. The book is structured into several chapters, namely:
    - Chapter 1: Introduction to Teaching And Learning At A Distance Foundation Of Distance Education
    - Chapter 2: Essential Elements of Teaching And Learning At A Distance Foundation Of Distance Education
    - Chapter 3: Teaching And Learning At A Distance Foundation Of Distance Education in Everyday Life
    - Chapter 4: Teaching And Learning At A Distance Foundation Of Distance Education in Specific Contexts
    - Chapter 5: Conclusion
  2. In chapter 1, this book will provide an overview of Teaching And Learning At A Distance Foundation Of Distance Education. This chapter will explore what Teaching And Learning At A Distance Foundation Of Distance Education is, why Teaching And Learning At A Distance Foundation Of Distance Education is vital, and how to effectively learn about Teaching And Learning At A Distance Foundation Of Distance Education.
  3. In chapter 2, the author will delve into the foundational concepts of Teaching And Learning At A Distance Foundation Of Distance Education. The second chapter will elucidate the essential principles that need to be understood to grasp Teaching And Learning At A Distance Foundation Of Distance Education in its entirety.
  4. In chapter 3, this book will examine the practical applications of Teaching And Learning At A Distance Foundation Of Distance Education in daily life. This chapter will showcase real-world examples of how Teaching And Learning At A Distance Foundation Of Distance Education can be effectively utilized in everyday scenarios.
  5. In chapter 4, this book will scrutinize the relevance of Teaching And Learning At A Distance Foundation Of Distance Education in specific contexts. This chapter will explore how Teaching And Learning At A Distance Foundation Of Distance Education is applied in specialized fields, such as education, business, and technology.
  6. In chapter 5, the author will draw a conclusion about Teaching And Learning At A Distance Foundation Of Distance Education. This chapter will summarize the key points that have been discussed throughout the book.
- This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. It is highly recommended for anyone seeking to gain a comprehensive understanding of Teaching And Learning At A Distance Foundation Of Distance Education.
