Geography: Discipline, Profession and Subject since 1870 Gary S. Dunbar, 2013-03-14 Gary S Dunbar Professional al i zay shun professional al i ZAY shun I do not think I like that word I am quite certain I do not like that word I said A F Martin of Oxford University in 1980 when I mentioned to him that I was making a study of the professionalization of geography in Europe and North America from about 1870 to 1930 I should not have been surprised by his reply because Mr Martin a highly regarded lecturer tutor and university man was in some ways a typical example of his generation of British geographers in that he did not have an advanced degree and his publication record was meager Except for a single remarkable essay Martin 1951 he was not well known in the field of geography at least not outside the United Kingdom Was he then a professional geographer Yes indeed because he was a full time scholar in a distinguished university even though he lacked the sort of credentials that have been demanded of subsequent generations of scholars at Oxford and elsewhere I certainly do not mean to denigrate Martin or his ilk I am simply using this anecdote to launch a book on the emergence of modern geography Teaching Methods in Science Subjects Promoting Sustainability Eila Jeronen, 2018-04-03 This book is a printed edition of the Special Issue Teaching Methods in Science Subjects Promoting Sustainability that was published in Education Sciences Understanding Disciplines and Subjects Mr. Rohit Manglik, 2023-03-23 In this book we will study about the nature and evolution of school subjects and their disciplinary foundations **Resources in Education**, 2000

The Disciplines Speak I Robert M Diamond, Bronwyn E Adam, 2023-08-11 This set of two volumes offers statements from disciplinary professional societies on what faculty work deserves recognition and reward in their unique culture community Volume I covers religion history geography math chemistry the arts business journalism and family consumer science plus the National Education Association *The University and Its Disciplines* Carolin Kreber, 2010-07-15 University teaching and learning take place within ever more specialized disciplinary settings each characterized by its unique traditions concepts practices and procedures It is now widely recognized that support for teaching and learning needs to take this discipline specificity into account However in a world characterized by rapid change complexity and uncertainty problems do not present themselves as distinct subjects but increasingly within trans disciplinary contexts calling for graduate outcomes that go beyond specialized knowledge and skills This ground breaking book highlights the important interplay between context specific and context transcendent aspects of teaching learning and assessment It explores critical questions such as What are the ways of thinking and practicing characteristic of particular disciplines How can students be supported in becoming

participants of particular disciplinary discourse communities Can the diversity in teaching learning and assessment practices that we observe across departments be attributed exclusively to disciplinary structure To what extent do the disciplines prepare students for the complexities and uncertainties that characterize their later professional civic and personal lives Written for university teachers educational developers as well as new and experienced researchers of Higher Education this highly anticipated first edition offers innovative perspectives from leading Canadian US and UK scholars on how academic learning within particular disciplines can help students acquire the skills abilities and dispositions they need to succeed academically and also post graduation Carolin Kreber is Professor of Teaching and Learning in Higher Education and the Director of the Centre for Teaching Learning and Assessment at the University of Edinburgh
