Teaching German In Twentieth Century America:

Teaching German in Twentieth-century America David P. Benseler, Craig W. Nickisch, Cora Lee Nollendorfs, 2001

Teaching a foreign language and culture is always a challenge but it has been especially problematic to teach the German language and culture in the United States in the twentieth century The tradition of Germany's great poets and thinkers of the past has been joined by a starker legacy Through explorations of such topics as the world wars the Holocaust women in the language teaching profession Jewish contributions and technology's impact on scholarship this volume inspects the fascination and frustrating relationships of the two cultures as they interact through the teaching of German in American educational systems from small liberal arts colleges to large and famous universities This volume resulted from a conference Shaping Forces in American Germanics held in Madison Wisconsin in September 1996

Taking Stock of German Studies in the United States Rachel J. Halverson, Carol Anne Costabile-Heming, 2015

Despite cuts in the past decade enrollments in US German programs have increased modestly a fact that surely has to do with the importance of Germany and its language on the world stage The contributors to this volume examine the factors shaping German language study in the new millennium highlighting how creative innovative inspired approaches have allowed German to weather many of its challenges The volume will be of interest to scholars teachers and students of German who are committed to invigorating its study in the United States

Racism and Xenophobia in Early Twentieth-Century American Fiction Wisam Abughosh Chaleila, 2020-12-29

The Melting Pot The Land of The Free The Land of Opportunity These tropes or nicknames apparently reflect the freedom and open armed welcome that the United States of America offers However the chronicles of history do not complement that image These historical happenings have not often been brought into the focus of Modernist literary criticism though their existence in the record is clear This book aims to discuss these chronicles displaying in great detail the underpinnings and subtle references of racism and xenophobia embedded so deeply in both fictional and real personas whether they are characters writers legislators or the common people In the main chapters literary works are dissected so as to underline the intolerance hidden behind words of righteousness and blind trust as if such is the norm Though history is taught it is not so thoroughly examined To our misfortune we naively think that bigoted ideas are not a thing we could become afflicted with They are antiques from the past yet they possessed many hundreds of people and they surround us still Since we've experienced very little change it seems discipline is necessary to truly attempt to be rid of these ideas

The Twentieth Century in 100 Moments Akim Reinhardt, Heather Rounds, 2016-02-15 This engrossing retrospective on the last century pulls together the 100 biggest moments for mankind from success and progress to war and hardship

Outreach Strategies and Innovative Teaching Approaches for German Programs Melissa Etzler, Gabriele Maier, 2020-12-28 Outreach Strategies and Innovative Teaching Approaches for German Programs explores recruitment curricular design and student retention in modern language instruction by sharing best practices and a wide variety of pragmatic initiatives from teacher

scholars who have been involved in the successful building of German programs With German programs facing dwindling grant monies as students across the country shift from the liberal arts into career oriented fields it is paramount to promote German programs vigorously to offer courses that reflect and compel students interest to keep students engaged in extracurricular activities and to establish a community of like minded language learners The combination of curriculum based strategies coupled with innovative projects and extracurricular and outreach activities is intended to serve as a guideline for teachers and scholars alike who are in need of best practices they can use to boost enrollment and attract and retain more students

Kuno Francke's Edition of the German Classics (1913-15) Jeffrey L. Sammons, 2009 The twenty volume edition of The German Classics Masterpieces of German Literature Translated into English was edited by Kuno Francke of Harvard 1855 1930 the most prestigious professor of German in America at the time While it bears the imprint dates 1913 and 1914 it was not completed until mid 1915 just in time for the submarine sinking of the passenger liner Lusitania in May of that year The edition was publicized with great fanfare and was well received at first but with the outbreak of the European war in 1914 and the entry of the United States into it in 1917 American sentiment turned against all things German The reviews became hostile the edition was nearly pulped its publisher went bankrupt and Francke felt obliged to resign his Harvard professorship Kuno Francke s Edition of The German Classics 1913 15 describes the origins of the edition recounts the careers of the editors and some fifty professional contributors seeks to identify approximately 115 translators and comments on the nearly 500 illustrations mostly German art of the nineteenth century This book also introduces the selections from the 114 featured authors almost a third of whom were still alive at the time of publication and evaluates the critical commentary The edition emerges from the study as a laboratory of the high prestige of German literature and culture in the United States before it fell into permanent decline at the time of World War I

'Relations Stop Nowhere' Hugh Ridley, 2007-01-01 This book attempts for the first time a comparative literary history of Germany and the USA in the nineteenth and twentieth centuries Its material does not come from the familiar overlaps of individual German and American writers but from the work of the literary historians of the two countries after 1815 when American intellectuals took Germany as a model for their project to create an American national literature The first part of the book examines fundamental structural affinities between the two literary histories and the common problems these caused especially in questions of canon realism aesthetics and in the marginalization of popular and women s writing In the second part significant figures whose work straddle the two literatures from Sealsfield and Melville Whitman and Thomas Mann to

Nietzsche Emerson and Bellow are discussed in detail and the arguments of the first part are shown in their relevance to understanding major writers This book is not merely comparative in scope it shows that only international comparison can explain the course of American literary history in the nineteenth and twentieth century As recent developments in American Studies explore the multi cultural and hybrid nature of the American tradition this book offers evidence of the dependencies which linked American and German national literary history

Images of Germany in American Literature Waldemar Zacharasiewicz, 2007-04 Although German Americans number almost 43 million and are the largest ethnic group in the United States scholars of American literature have paid little attention to this influential and ethnically diverse cultural group In a work of unparalleled depth and range Waldemar Zacharasiewicz explores the cultural and historical background of the varied images of Germany and Germans throughout the past two centuries Using an interdisciplinary approach known as comparative imagology which borrows from social psychology and cultural anthropology Zacharasiewicz samples a broad spectrum of original sources including literary works letters diaries autobiographical accounts travelogues newspaper reports films and even cartoons and political caricatures Starting with the notion of Germany as the ideal site for academic study and travel in the nineteenth century and concluding with the twentieth century image of Germany as an aggressive country this innovative work examines the ever changing image of Germans and Germany in the writings of Louisa May Alcott Samuel Clemens Henry James William James George Santayana W E B Du Bois John Dewey H L Mencken Katherine Anne Porter Kay Boyle Thomas Wolfe Upton Sinclair Gertrude Stein Kurt Vonnegut Thomas Pynchon William Styron Walker Percy and John Hawkes among others

Diversity and Decolonization in German Studies Regine Criser, Ervin Malakaj, 2020-02-13 This book presents an approach to transform German Studies by augmenting its core values with a social justice mission rooted in Cultural Studies German Studies is approaching a pivotal moment On the one hand the discipline is shrinking as programs face budget cuts This enrollment decline is immediately tied to the effects following a debilitating scrutiny the discipline has received as a result of its perceived worth in light of local regional and national pressures to articulate the value of the humanities in the language of student professionalization On the other hand German Studies struggles to articulate how the study of cultural social and political developments in the German speaking world can serve increasingly heterogeneous student learners This book addresses this tension through questions of access to German Studies as they relate to student outreach and program advocacy alongside pedagogical models
