The Teaching Marketplace Bart Brodsky, Janet Geis, 1991 You can build a sideline career teaching with or without formal credentials Here s how to design classes find jobs through schools color photograph cover 17 photographs 11 illustrations index bibliography Bar coding available CRIP 1442 A Walnut No 51 Berkley CA 94709 415 525 9663 Teachers as Tutors: Shadow Education Market Dynamics in Georgia Magda Nutsa Kobakhidze, 2018-08-10 The so called shadow education system of private supplementary tutoring has become a global phenomenon but has different features in different settings This book explores the ways in which teacher tutors beliefs social norms ideals about professionalism and community values shape their economic decisions in the informal shadow education marketplace Through theoretical lenses of economic sociology and anthropology this study uncovers strong social and moral embeddedness of the shadow education market in social relationships cultural norms and moralities in post Soviet Georgia The book questions some of the basic assumptions that the predominant neoliberal discourse promotes worldwide The book is based on Kobakhidze s PhD dissertation which won the Comparative and International Education Society CIES Gail P Kelly Outstanding Dissertation Award A theoretically innovative and substantively enlightening account of shadow schooling in Georgia A landmark achievement Roger Dale University of Bristol an important and timely topic addressed with exceptional thoroughness It constitutes a solid piece of academic work and clearly makes a significant contribution to the field of shadow education Heidi Biseth University College of Southeast Norway Chair of Gail P Kelly Award Committee in 2017 through robust critical analysis Kobakhidze invites a humanistic re-visioning of economy and society Ora Kwo The University of Hong Kong *Market Education* Andrew Coulson, 2017-09-08 Discontent with public education has been on the rise in recent years as parents complain that their children are not being taught the basics that they are not pushed to excel and that their classrooms are too chaotic to encourage any real learning The public has begun to reject school bond levies with regularity frustrated by what it perceives to be mounting education costs unaccompanied by increased achievement or accountability Coulson explores the educational problems facing parents and shows how these problems can best be addressed He begins with a discussion of what people want from their school systems tracing their views of the kinds of knowledge skills and values education should impart and their concerns over discipline drugs and violence in public schools Using this survey of goals and attitudes as a guide Coulson sets out to compare the school systems of civilizations both ancient and modern seeking to determine which systems successfully educated generations past and which did not His historical study ranges from classical Greece and ancient Rome through the Islamic world of the Middle Ages to nineteenth century England and modern America Drawing on the historical evidence of how these various systems operated Coulson concludes that free educational markets have consistently done a better job of serving the public s needs than state run school systems have He sets out a blueprint for competitive free market educational reform that would make schools more flexible more innovative and more responsive to the needs of

parents and students He describes how education for low income children might be funded under a market system and how the transition from monopolistic public education to market education might be achieved Coulson s *Market Education* touches on a wide range of issues including declines in academic achievement minority education the role of public school teachers and mismanagement and corruption in educational bureaucracies Coulson examines alternative reform proposals from vouchers and charter schools to national standards for school curricula This timely and engaging book will appeal to parents educators and others concerned with the quality and cost of schooling and will serve as an excellent resource in college courses on the economics and history of education **Class Strategies and the Education Market** Stephen J.

Ball,2003-08-29 Examines the ways in which the middle classes maintain and improve their social advantages in and through education The Evolution of Teaching Rich Waters,2014-10-08 The Evolution of Teaching invites teachers to rethink what teachers and schools do The need to rethink the role of teachers is driven by an abundance of data showing that teachers are increasingly unhappy with their work Most critically they feel a loss of control over their work and their profession as they witness teacher voices being marginalized by impersonal authorities outside of schools who dictate more and more of what teachers and schools must do The antidote to this condition is the evolution of teaching Teachers need to take charge and lead change They need to redefine teaching and schooling in such a way that it authentically supports student learning and teacher learning They must redefine it in a way that supports every teacher s desire to have a personal impact on students while having control over their own work stakeholder standing as respected professionals and a full career of professional growth As A Guidebook to the Advancement of Teaching Teacher Education and Happier Careers this text will assist teachers in reconceiving the profession of teaching in ways that will make it more personally satisfying while acknowledging that the work of teachers in the twenty first century must necessarily be different from what we have now legacy practices of standardization left over from the industrial age *Market Movements* Thomas C. Pedroni,2013-01-11 Winner of the 2009 Critics Choice Book Award of the American Educational Studies Association AESA Through careful ethnographic research Market Movements represents community leaders school officials and most importantly African American working class families who have used vouchers as a means of removing their children from public schools they deemed unacceptable The book works to discern the overlaps and tensions between the educational visions of African American voucher families and those of powerful conservative educational forces in U S society which purport to be allied with them To the extent that there are points of divergence with the educational right and points of convergence with educational progressives this book provides a hopeful message and a practical vision It seeks to accomplish some of the critical empirical and conceptual groundwork that is necessary in order to renew the increasingly fractious relations between those social actors teachers communities of color critical researchers and labor unions most likely to defend and expand previous social democratic victories **Teaching Teachers** James W. Fraser,Lauren Lefty,2018-10-01 Teacher education in America has changed

dramatically in the past thirty years with major implications for how our kids are taught As recently as 1990 if a person wanted to become a public school teacher in the United States he or she needed to attend an accredited university education program Less than three decades later the variety of routes into teaching is staggering In *Teaching Teachers* education historians James W Fraser and Lauren Lefty look at these alternative programs through the lens of the past Fraser and Lefty explain how beginning in 1986 an extraordinary range of new teaching programs emerged most of which moved teacher education out of universities In some school districts and charter schools superintendents started their own teacher preparation programs sometimes in conjunction with universities sometimes not Other teacher educators designed blended programs creating collaboration between university teacher education programs and other parts of the university linking with school districts and independent providers and creating a range of novel options Fraser and Lefty argue that three factors help explain this dramatic shift in how teachers are trained an ethos that market forces were the solution to social problems long term dissatisfaction with the inadequacies of university based teacher education and the frustration of school superintendents with teachers themselves who can seem both underprepared and too quick to challenge established policy Surveying which programs are effective and which are not this book also examines the impact of for profit teacher training in the classroom Casting light on the historical and social forces that led to the sea change in the ways American teachers are prepared *Teaching Teachers* is a substantial and unbiased history of a controversial topic

Teaching Machines Bill Ferster, 2014-11-17 Technology promises to make learning better cheaper faster but rarely has it kept that promise The allure of educational technology is easy to understand Classroom instruction is an expensive and time consuming process fraught with contradictory theories and frustratingly uneven results Educators inspired by machines contributions to modern life have been using technology to facilitate teaching for centuries In *Teaching Machines* Bill Ferster examines past attempts to automate instruction from the earliest use of the postal service for distance education to the current maelstrom surrounding Massive Open Online Courses He tells the stories of the entrepreneurs and visionaries who beginning in the colonial era developed and promoted various instructional technologies Ferster touches on a wide range of attempts to enhance the classroom experience with machines from hornbooks the Chautauqua movement and

correspondence courses to B F Skinner s teaching machine intelligent tutoring systems and eLearning The famed progressive teachers researchers and administrators that the book highlights often overcame substantial hurdles to implement their ideas but not all of them succeeded in improving the quality of education Teaching Machines provides invaluable new insight into our current debate over the efficacy of educational technology **Mapping Corporate Education Reform** Wayne Au, Joseph J. Ferrare, 2015-04-10 Mapping Corporate Education Reform outlines and analyzes the complex relationships between policy actors that define education reform within the current neoliberal context Using social network analysis and powerful data visualization tools the authors identify the problematic roots of these relationships and describe their effects both in the U S and abroad Through a series of case studies each chapter reveals how powerful actors from billionaire philanthropists to multinational education corporations leverage their resources to implement free market mechanisms within public education By comprehensively connecting the dots of neoliberal education reforms the authors reveal not only the details of the reforms themselves but the relationships that enable actors to amass troubling degrees of political power through network governance A critical analysis of the actors and interests behind education policies Mapping Corporate Education Reform uncovers the frequently obscured operations of educational governance and offers key insights into education reform at the present moment
